Clinical eVisit Guide for Patients

Please note: All of the following information has been sourced from Reacts and can be found on www.reacts.com/onboarding-patient

What is a Clinical eVisit?

A Clinical eVisit is a private, secure face-to-face appointment between you and your doctor on your smartphone, tablet or computer.

These are useful for appointments that do not require a physical examination in the office.

The following guide will prepare you for your first Reacts Clinical eVisit with your doctor.

Please note that Reacts is a secure and confidential application which meets the high standards of the healthcare industry. YOUR PERSONAL INFORMATION WILL ALWAYS BE PROTECTED.

Learn more about Reacts’ privacy policy at www.reacts.com/en/legal/privacy

To perform a virtual visit using Reacts, you will need:

• A computer, tablet, or a smart phone. If using a computer, you will also need a webcam, microphone, and speakers (or headphones with a built-in microphone);
• An internet connection (cellular, Wi-Fi, or wired);
• A valid personal email address;
• A Reacts ‘Guest Account’ (Provided by doctor’s office); and,
• The Reacts application
Step 1: Getting invited to Reacts by your doctor's office

**Please note:** Do **not** download the Reacts app prior to receiving invitation from Reacts. You will receive an invitation to join Reacts in your email. Be sure to check your junk mail or Promotions tab if you do not see an email from Reacts in your inbox.

Step 2: Complete your Reacts account registration

The email from Reacts will look like this:

Hi,

You have been invited to a virtual appointment with Kate DuQuenshay on the Reacts platform.

Reacts will allow you to perform virtual video visits, engage, and interact in a simple and secure way.

Before you can access your virtual appointment and start communicating with your provider through Reacts, you will first need to complete your account registration by clicking on the button "Register now".

Details of your virtual appointment:

**Date:** 2020-11-10  
**Time:** 10:00 AM Eastern Time  
**Duration:** 00 h 15 min

**Link to join your virtual appointment:**

At the time of your appointment, you will simply need to click on the appointment link or login to Reacts, go to the section "My appointments", and enter the virtual waiting room. If you plan to use a tablet or smartphone to join your appointment, please make sure you first install the Reacts mobile application on your device from the **Apple Store** or **Google Play Store**.

If you have any questions regarding your virtual appointment or if you want to cancel or re-schedule your appointment, please contact your healthcare professional.
Step 2: Complete your Reacts account registration (continued)

After clicking **Register Now**, you will be taken to the Reacts 'Sign Up' page (image to the left).

You will notice that your first name, last name, and email have been populated by your doctor's office.

All you need to do is create a password and then re-enter the password in the 'confirm password box'. The password needs to be at least 8 characters including at least one uppercase letter (capital letter), one lowercase letter, and one number.

After creating your password, you will need to read the Reacts Terms and Conditions and Privacy Policy.

After reading the Terms and Conditions, you need to check the boxes to finalize creating your account.

Finalize your account creation by clicking on the **Create my account** button.

Once your Reacts account has been created, you will receive an email confirming “Your account has been created”. **You will not have to go through this process again for future appointments** – even if appointments are with other healthcare providers.

**Note:** If you don’t receive this confirmation email, check your e-mail “spam” or "promotion” folder or contact your doctor's office to speak with the medical secretary.
Step 3: Download the Reacts application on your tablet or smartphone OR access Reacts directly from your computer on the web

**Option 1: Access from Smartphones or Tablets  *Recommended***

Download the Reacts App from the App Store if you are using an Apple iPhone or iPad or from the Google PlayStore if you are using an Android phone or tablet by clicking on the links in the confirmation email (as shown below) or type “Reacts secure collaboration” in the App Store or Google PlayStore.

**For Apple iPhone or iPad:**

![iOS icon]

iOS 10 or higher

*Get on AppStore*

**For Android Smart Phone or Tablet:**

![Android icon]

Android 7 or higher

*Get on PlayStore*

*Please note: You must have the app to use Reacts on a mobile device*

Once the application has been downloaded on your device, open it by clicking on the Reacts icon:
Option 1: Access from Smartphones or Tablets (continued)

When opening the application for the first time, you will see some pop-ups (pictured below) asking whether you accept Reacts sending you notifications and accessing your microphone and camera. **It is very important that you click “Allow/OK” for all of these pop-ups,** otherwise you will not get Reacts notifications, and your doctor will not be able to see or hear you during your Clinical eVisit.

Then simply enter your email address and password to log in to Reacts (same email address and password you used to set up your account). You must be logged into Reacts for your doctor to call you. **Please note:** By setting the **Remember me** button to “on” you will not have to re-enter your e-mail address the next time you open Reacts.
**Option 2: Access from your Computer (If you do not have a smartphone or tablet)**

*KHSC Patient feedback:* The Reacts app on your smartphone or tablet is the easiest way to access Reacts; however, if you do not have smartphone or tablet and have a computer, you can access Reacts through the internet browser, Google Chrome.

If you are using a Mac or PC computer (laptop or desktop), you can access Reacts by using the **Google Chrome** browser and going to [www.reacts.com](http://www.reacts.com) *(If you don’t have Google Chrome on your computer, you can download it for free at [www.google.com/chrome](http://www.google.com/chrome). If you do have Google Chrome on your computer, be sure it is the most recent version using the instructions below. Reacts does not work on other browsers – only on Google Chrome.)*

**Make sure Google Chrome is up to date**

1. Open Google Chrome and click on the three dots in the top right corner of the screen.

2. Click "Help".

3. Click "About Google Chrome".

4. Google Chrome will start updating. Once it is finished, click "Relaunch" to restart the browser.

**Please note** that you will not have to relaunch if your Google Chrome is already up to date.
Option 2: Access from your Computer (continued)

You will find the “Log In” button in the upper right corner of the screen.

This will bring you to the login page – enter your email and password (that you used to create account) and click on Log in.

This will start the Reacts application. Make sure you then allow Reacts to send you notifications, and to use your camera and microphone (see below).
Step 4: Log in to your Reacts account before your Clinical eVisit

In order to perform a Clinical eVisit with your doctor using Reacts, log into Reacts using your email address and the password you created when you made your account in step 2.

Once logged in to Reacts, you will be on the home page (see pictures below showing the home pages of the various versions of Reacts whether you are using web-based or mobile platform):

**Reacts Mobile App home page for Apple iPhone or iPad**

**Reacts Mobile App home page for Android Smart Phone or Tablet**
Step 4: Log in to your Reacts account **before** your Clinical eVisit (continued)

**Reacts web app home page**

(Using the Google Chrome browser on your computer):

If you are using the web version of Reacts, make sure your microphone, webcam, and speakers are working before your session.

Just click audio-video option in the left-hand menu (see picture below) to check everything.
Step 4: Log into your Reacts account **before** your Clinical eVisit (continued)

**Note:** If you haven’t agreed to share your webcam, microphone, and speakers when you first used Reacts, you can activate them by clicking on the small padlock icon in the bar at the top of your browser to access the panel. (see below)
Step 5: Be ready to join your Clinical eVisit with your professional

To join the Appointment:

- Go to the appointment email invitation, and click on the appointment link. Please note that Reacts will only work in Google Chrome. If your default browser is anything but Google Chrome, you may need to copy and paste this link into Google Chrome. Sign in using the email and password you used when you registered your account.

Or,

- Alternatively, you can login to www.Reacts.com before your appointment, and find your appointment under “My Appointments” in the Reacts Application. Click on the Start button to join.

Mobile users will go right into the virtual meeting. If you are using Reacts on your computer, you will have to click the Enter virtual waiting room button.

As soon as your doctor or healthcare professional is ready, they will join you and you will see him/her appear on the screen. You do not need to click "Begin Session" (if you see that in the top right hand of your screen). You will then be placed in a secure video call with your doctor.

If you experience technical issues, call your doctor’s office (phone number provided by secretary).
Reacts Icon Legend

**Begin Session** is a feature used by healthcare providers to move around and change the video screens. **Please note** that you do not need to select this icon for your appointment to take place. The appointment will already be in progress. You should not select this icon as it will cause the screen to go black.

If you accidentally press **Begin Session**, the screen will go black, and the icon will change to a **Face to face** button. Simply press this button to return to the normal view.

The **Hang Up** button will end the session. If you accidentally hang up, simply go back to your appointments and join the call again.

**Rotate Cam** allows you to switch your video between your device's front facing camera, and rear facing camera.

The **More** icon will show you some hidden, additional icons such as Mute, Mute Cam, and Messaging.

The **Mute** button will mute your microphone. **Please note** that if you do this, your healthcare provider will not be able to hear you. Once you click mute, the icon will be blue and have a line through it, meaning you are muted. To unmute, simply click the button again.

**Mute Cam** will turn off your video. **Please note** that if you press this, your healthcare provider will not be able to see you. Once you click **Mute Cam**, the icon will change to the blue **Unmute Cam** button. Simply click this to turn your video back on.

The **Messaging** icon allows people to send instant messages through Reacts. **Do not** use this feature to communicate with your healthcare provider. If you have a concern, call the office as always, or in an emergency call 911.

If you accidentally switch screens during an appointment, a green bar that says "**Click here to return to session**" will appear at the top of the screen. Click the green bar to return to the appointment.
