IMPORTANT INFORMATION

RESEARCH

Research is an important part of our clinical programs at Kingston General Hospital and Hotel Dieu Hospital. Participation in appropriate clinical studies may often be of value, not only to future patients' care, but also, at times for current patients. Access to newer forms of therapy offered by participation may be of importance in a patient's overall care. Although not all studies may be relevant to every patient, certain treatment protocols may offer patients early access to potentially optimal therapy. Please understand that even if you give consent to being approached about potential research participation, you can always decline to be included for any or all studies.

By not opting out, patients retain the flexibility to make the best choice, based on informed consent, whether to participate in each individual study.

PATIENT SATISFACTION SURVEYS

KGH and HDH are committed to a hospital wide program, which manages patient compliments and concerns. Our *Patient Satisfaction Survey Tool*, which is randomly sent to patients following discharge, provides patients and family members with a way to express opinions and share compliments and constructive concerns about their experience at KGH. The results of the surveys, which are anonymous, are taken very seriously. Patient compliments provide an opportunity for recognition of individual hospital care teams and service teams. As well constructive concerns will allow us to manage risk and identify the need of improving current professional practice, patient services and education needs within the organization.

FUNDRAISING

To provide you and your family with the most advanced medical treatments and to attract and retain world-class medical professionals, KGH and HDH need the most up-to-date health care equipment. High-tech medical equipment is constantly being developed and upgraded, but it is very expensive. The government does not fully fund the purchase of hospital equipment, education and research. Hospital fundraising is the only way – together - we can ensure that people in Kingston and the region have access to the very best life-saving medical treatments and world-class medical professionals.

Only your name and address are provided to us for fundraising purposes, as outlined in the legislation. You may be contacted by the hospital several weeks after you have left the hospital asking for your support of the Hospitals' Foundation. Should you not wish to receive mailings in future, all you need do is advise the Foundation of your wishes.

We appreciate your continuing support.
