

How to arrange an Outpatient Coronary Angiogram at KGH

Our outpatient coronary angiogram program at KGH is designed for patients who are stable enough to wait at home for their procedure.

Patients are scheduled based on a calculated recommended wait time (RMWT) designed by the Cardiac Care Network of Ontario. The RMWT is calculated using the information provided on the CCN referral form. Please give us as much information as possible to ensure each patient is booked accordingly. Incomplete or unsigned forms will be returned prior to patients being considered for outpatient procedures.

Please use our **outpatient fax coversheet** as a guideline for the information required to be sent with your referral.

If you have an urgent outpatient, please call the KGH Regional Cardiac Care Coordinator (RCCC), Louise Snider at 613-548-1399 ext. 2 **or** indicate the patients priority on the referral form. We will do our best to meet the patient's needs.

If at any time you or your patients have questions or concerns please call the Kingston General Hospital Cardiac Care Team at 613-548-1399 ext. 2
