

POST SECONDARY STUDENT VOLUNTEER INTAKE

Kingston Health
Sciences Centre

Centre des sciences de
la santé de Kingston

We have different application intake processes for post-secondary students, depending on their expected length of stay in Kingston.

- For those who live in Kingston/Area on a year-round basis and/or can make at least a 10 to 12 month commitment, we accept applications anytime
- If you are only here for the fall and winter terms we have an application/reference form deadline of March 31st. This allows us to consider all applicants before we begin interviews in April for volunteers to start in September. In early September, we will determine how many volunteers we require for fall and winter and if additional interviews are required we will contact applicants who applied after the March 31 deadline.
- If you are only available for spring and summer shifts, we have an application/reference form deadline of April 30th. You must be available to i) volunteer from the beginning of May through to the end of August, ii) attend an interview by May 4th and iii) be available to attend hospital orientation on the evening of May 14th.

Please refer to the Application Process webpage for more details and to print the required forms.
