Secondary School – Senior Level Student Intake

Kingston Health Sciences Centre accepts applications from grade 11, 12 and fifth or returning year students who are interested in volunteering on a weekly basis and who can meet the minimum six month commitment.

Students with an interest in a health care related career will be given top priority and we ask that at least one of your two references provided be a guidance counsellor or teacher.

High school students of all grades are encouraged to apply for our summer program.

Please refer back to the Application Process webpage for more details on the intake steps and to access the online application form and reference form.
