Strategic Performance Indicators

Percent of admitted patients with the most responcible diagnosis of hip fracture receive surgery within 48-hours

٤

Strategic Direction 5	
Maximize our education, research and academic health sciences potential	
Outcome: The Kingston-wide Health Research Insitute is a legally incorporated	
entity with charitable status and approved for the purpose of scientific research	
and experimental development	
Strategic Performance Indicators	
All required resources are in place at KHSC to support the multisource feedback component of Competency-Based Medical Education (CBME)	9
All legal and operational documents are in place, approved and QHPRI is ready to launch	11
Strategic Direction 6	
Contribute to and support a high-performing regional health-care system with our pa	rtners
Outcome: KHSC is part of an integrated and sustainable regional health-care system	
Strategic Performance Indicators	
KHSC achieves \$1.25 million of integration-related savings	14
Enabling High Performance	
People	
Outcome: Empower our people and patient partners to improve the patient experien	ice
Strategic Performance Indicators	
Percent of vacancies at KHSC	15
Enabling High Performance	
Technology	
Outcome: Rapid transmission of information improves care & operational efficiency	
Strategic Performance Indicators Strategic Technology project plans meet quarterly targets	16
Enabling High Performance	
Facilities	
Outcome: Phase 2 redevelopment preliminary designs are complete	
Strategic Performance Indicators	
Required steps in the procurement process meet quarterly milestones	17

KHSC Strategy Performance Report Fiscal 2018-19

Enabling High Performance	
Finance	
Outcome: KHSC is a top operational performer amongst Ontario teaching hospitals	
<u>Strategic Performance Indicators</u> The operational budget is balanced, and the capital spending capacity achieved is \$17.5 million	18
Expenses not to exceed revenue	19
Enabling High Performance	
Philanthropy	
Outcome: KHSC has a viable plan to fund the local share of our Phase 2 redevelopment project	
<u>Strategic Performance Indicators</u> All employees are given a personalized communication offering options to support the hospital through UHKF	20
Indicator Status Legend	21

Q4 FY2019 Strategy Performance Indicators Report

Improve the patient experience through a focus on compassion and excellence

KHSC is a top performer on the essentials of quality, safety, & service

Indicator: Percentage of QIP indicator targets achieved

	Actual	Target
18-Q4		80
19-Q1	57	80
19-Q2	38	80
19-Q3	50	80
19-Q4	38	80

Describe the tactics that were implemented in this quarter to address the achievement of the target:

Indicators identified in the Quality Improvement Plan (QIP) address 4 dimensions of quality: effectiveness, patient-centredness, safety, and timeliness. For each of the 10 indicators on the QIP methods were identified to improve performance. Measures and targets were identified when feasible.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

The 2018-19 QIP contains 3 indicators that address effectiveness. Q4 data are not yet available for these indicators: Readmission data for Mental Health & Addictions patients, Readmission rate for COPD patients, and % of patients that responded positively to the question, "Did you receive enough information from hospital staff about what to do if you were worried about your condition or treatment after you left the hospital?" Q3 data is the most recent available data for the final of these indicators because there is a delay between the patient's care and completion of the survey. Q3 performance for this indicator was modestly below target; however, a number of improvements are being worked on to improve performance.

The QIP contains four indicators of patient-centredness that reflect patient experience as measured using standardized patient experience surveys in 3 areas: Inpatient, Emergency Department (KGH site) and the Urgent Care Centre (HDH site). Q4 data are not yet available due to the delay between the patient's care completions of the survey. Q3 data is the most recent available data and responses were modestly below target. Survey results continue to be reviewed to identify improvement opportunities. The 4th indicator of patient-centredness, home support for patients requiring palliative care, met the target. This indicator will continue to be monitored as part of a strategic initiative to expand access to Palliative Medicine and palliative care approaches.

The 2018-19 QIP contains two safety indicators: medication reconciliation at discharge and # of workplace violence incidents reported by workers within a 12-month period. Targets were met for both indicators.

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

Yearend targets were achieved for three of the QIP indicators.

Definition: DATA: Decision Support COMMENTS: Janine Schweitzer EVP: Brenda Carter REPORT: SAA INDICATOR

Target: Target 18/19: 80% Perf. Corridors: Red <=50% Yellow 51-74% Green >=75%

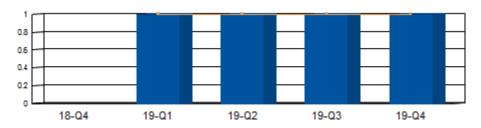

Q4 FY2019 Strategy Performance Indicators Report

Improve the patient experience through a focus on compassion and excellence

KHSC is a top performer on the essentials of quality, safety, & service

Indicator: Accreditation sustainability plan meet quarterly milestones

	Actual	Target
18-Q4		
19-Q1	1	1
19-Q2	1	1
19-Q3	1	1
19-Q4	1	1

Describe the tactics that were implemented in this quarter to address the achievement of the target:

There were two Q4 targets: (1) Review new/revised Accreditation Standards and ROPs, communicate changes to portfolio leaders and determine actions required to achieve compliance; (2) Form working group to coordinate the annual review of accreditation standards incorporates with other relevant standards and guidance documents, to maintain accreditation readiness and avoid duplication of effort.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

There were no significant changes to any of the standards or ROPs this year.

KHSC leaders were invited to participate on an accreditation readiness working group. A number of leaders expressed interest. The working group will meet in Fiscal 2019-20 Q1.

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

The year-end accreditation sustainability target was met. The accreditation readiness working group will help to ensure that KHSC adopts a coordinated and efficient way to prepare for the next Accreditation Canada survey.

DATA: Janine Schweitzer COMMENTS: Janine Schweitzer EVP: Brenda Carter REPORT: STRATEGY INDICATOR

The goal is to develop an accreditation sustainability plan that ensures we learn from our most recent accreditation experience, build capacity, and embed accreditation standards and other quality standards into our quality planning and 'way of doing business' at KHSC.

Accreditation is a voluntary process for health-care organizations to assess care and service against national standards of excellence. Historically, many organizations have worked hard to prepare for accreditation surveys and have addressed recommendations and improvement opportunities contained in accreditation reports. Organizations have not often developed and implemented plans to maintain accreditation readiness. The consequence is a 4-year cycle of exhausting accreditation preparation followed by recovery. The goal is for KHSC to develop an accreditation sustainability plan that ensures we learn from our most recent accreditation experience, build accreditation leadership capacity, embed accreditation standards and other best practices in our quality planning and our 'way of doing business at KHSC.

Q1: (1) Review, communicate and respond to the Accreditation Report. This includes: developing action plans for unmet standards and ROPs in accordance with Accreditation Canada timelines(s); (2) Create a quarterly dashboard to track 'unmet' high priority standards and ROPs that are identified in the Accreditation Report for discussion with Executive; maintain dashboard until all standards have been addressed. (3) Conduct, analyze and report results from a multi-faceted post survey evaluation to determine what worked well and didn't, e.g., walkabouts – frequency and format; accreditation binders; support provided by PSQR; communication

Q2: Update quarterly dashboard of 'unmet' high priority standards and ROPs and discuss with Executive

Q3: (1) Administer Patient Safety Culture Survey; analyze results, identify top 1 – 3 priorities for action with action plans. Seek executive endorsement. (2) Update quarterly dashboard of 'unmet' high priority standards and ROPs and discuss with Executive

Q4: (1) Review new/revised Accreditation Standards (released in January); provide standards to applicable areas; assess changes to standards, determine actions required to achieve compliance. Monitor the achievement of plans to achieve compliance with new standards. (2) Review relevant other standards and guidance documents that pertain to revised standards, e.g. HIROC Risk Assessment Checklists; QIP; Order Sets, etc. to identify work that may be underway and ensure key stakeholders are engaged in reviewing the accreditation standards.

Target: Target 18/19: 100% of tactic workplan Perf. Corridor: Red No = 0, Yellow In progress = BLANK with Yellow Status, Green Yes = 1.

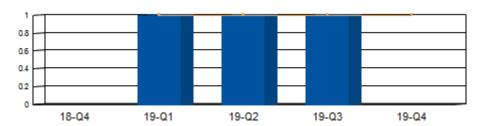

Q4 FY2019 Strategy Performance Indicators Report

Improve the experience of our people through a focus on work-life quality

Our people are inspired and proud to be part of the KHSC community

Indicator: All KHSC leaders complete team engagement action plans

	Actual	Target
18-Q4	·	
19-Q1	1	1
19-Q2	1	1
19-Q3	1	1
19-Q4		1

Describe the tactics that were implemented in this quarter to address the achievement of the target:

The first joint long service celebration for KHSC occurred in January. This integrated celebration carried elements of past HDH and KGH recognition events forward for those who had greater than 25 years of service. Feedback was positive for the event that included staff, physicians and volunteers. The Team Awards and Exceptional Healer Awards recognition event also occurred within the quarter.

The first KHSC Experience Survey for staff, physicians and volunteers took place Feb.20-Mar. 8. Questions regarding engagement were posed including work environment, leadership, culture, teams, relationships, feedback, development and recognition. Response rates were very good with 55% of staff, 41% of physicians and 55% of volunteers participating. This participation level signals our people are engaged in the organization's future enough to share their thoughts. The new survey tool and strategies were also successful given the positive response rate.

To prepare for driving action and quality improvement at the team level, team participation in the survey was reinforced with rewards for different sized teams. The team action plan tools were finalized and roll out of the results will begin in the first quarter of the next fiscal year 2019-20.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

Research suggests that a highly engaged workforce benefits patients and leads to better patient outcomes while improving overall organizational performance. Engagement is the amount of discretionary effort given in your work. For quality improvement and achieving the Quadruple Aim we also must focus on improving the experience of providing care with people at the centre. Our focus on the work experience at the team level will more effectively bring to life the integrated engagement strategy leading to our people being inspired and proud to be a part of the KHSC community.

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

A new delayed timeline was determined during the year driven by the survey timing. Given the actual engagement survey results will not be available until the next fiscal year, the tactics will continue throughout the spring to realize the target of team plan creation.

Q4 FY2019 Strategy Performance Indicators Report

Improve the experience of our people through a focus on work-life quality

Our people are inspired and proud to be part of the KHSC community

Definition: DATA: Micki Mulima COMMENTS: Micki Mulima EVP: Sandra Carlton, Mike Fitzpatrick REPORT: STRATEGY INDICATOR

Low levels of engagement poses a significant risk to patient care, internal service quality, and staffing budgets. Reducing the engagement gap must become part of risk management by hospital boards and executive teams (How Employee Engagement Matters for Hospital Performance by Graham Lowe PhD). Studies have shown that employee engagement decreases during times of significant change (such as during a merger or integration) and that these effects may linger. The percentage of highly engaged employees drops most within 3 6 months post M&A, and does not recover for up to 2 3 years which informs our expectations and future engagement plans.

We need to focus on the work experience at the team level to effectively bring to life the integrated engagement strategy leading to our people being inspired and proud to be a part of the KHSC community.

Research suggests that a highly engaged workforce benefits patients and leads to better patient outcomes while improving overall organizational performance. Engagement is the amount of discretionary effort employees give back to the organization in exchange for working in an environment that motivates and cares about them (Briner, 2014). That discretionary effort can have a positive impact on results. Engaged people are the fuel for your performance engine. Consider your greatest workplace challenge or boldest initiative, be it reducing turnover, ramping up productivity or finding efficiencies or integrating sites. You can't meet your goal without first having a strategy in place to engage your people. Measurement should be part of that strategy, but a survey alone doesn't change behaviour, improve outcomes or lead to cultural change. The call for engagement is embedded in the standards from Accreditation – embedded in our legislation – and embedded in our quest for Quality and achieving not only the Triple Aim – improving the individual experience of care; improving the health of populations; and reducing the per capita cost of healthcare – but achieving the Quadruple aim of improving the experience of providing care – engagement is a priority.

Q1: Establish timing for next survey and tool. Create team engagement plan template. Communicate expectations to leaders. Review and solidify corporate targets for volunteers, staff and physicians. Determine number of engagement plans targeted. Solidify integrated recognition strategy. Solidify learning enhancements. Continue with distributed leadership implementation. Host Leader and staff session on mindful leadership and resilience. Review workplace violence prevention plan.

Q2: Roll out team plans and timelines. Offer supports to leaders for completion. Build workplan for corporate plans. Determine communications strategy. Launch and rebrand LMS upgrade. Expand Peer Partner program. Target completion of team plans of 50%.

Q3: Conduct engagement survey (possible). Target team plan completion of 75%. Hold Leadership Days training. Create plan for non-violent crisis intervention sustainability training. Offer leadership training in mental health.

Q4: Conduct engagement survey (possible). Target team plan completion of 85%. Hold Leadership Days training. Communication of activities.

Target: Target 18/19: 100% Perf. Corridor: Red <=50%, Yellow 51-79%, Green >=80%

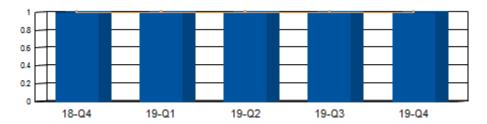

Q4 FY2019 Strategy Performance Indicators Report

Enable clinical innovation in complex-acute and specialty care

KHSC is positioned as a leading centre for complex-acute & specialty care

Indicator: Clinical innovation portfolio development process meets quarterly milestones

	Actual	Target
18-Q4	1	1
19-Q1	1	1
19-Q2	1	1
19-Q3	1	1
19-Q4	1	1

Describe the tactics that were implemented in this quarter to address the achievement of the target:

Clinical innovation will help us transform the culture at KHSC to one that sees opportunities and empowers staff, physicians and others to explore opportunities and implement changes that improve the quality of care directly or indirectly.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

The target performance for Q4 was stakeholder consultation on an updated draft plan for innovation at KHSC. The updated draft plan was developed by the Innovation Lead, Dr. E. Eisenhauer, and received endorsement at a President's Council meeting in January 2019 and by members of the MAC in February. The next step will be development of interest groups in different major themes of the innovation plan (minimally invasive procedure, artificial intelligence, etc.).

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

Yes, we are on target for the innovation portfolio.

DATA: Elisabeth Eisenhauer COMMENTS: Elisabeth Eisenhauer EVP: Mike Fitzpatrick REPORT: STRATEGY INDICATOR

To create a clear innovation portfolio that will address problems and gaps on delivery, engage staff and partners and drive towards better outcomes

Clinical innovation will help us transform complex-acute and specialty care services in response to changes in our healthcare system and current and projected population health demographics and emerging trends in health care improvements. This will help us to align our resources to meet the needs of patients and families today and into the future, and will help us to prioritize and invest in the cutting edge tools, approaches, partnerships, and services that deliver efficient, effective, and high quality care and to ensure optimal care integration with partners and other providers.

Milestones:
Q1: Initial information gathering from internal stakeholders
Q2: Information gather from external leaders and stakeholders
Q3: Synthesis of information and initial straw dog portfolio developed
Q4: Community/hospital feedback and town hall events to refine portfolio

Target: Target 18/19: 100% of tactic workplan Perf. Corridor: Red No = 0, Yellow In progress = BLANK with Yellow Status, Green Yes = 1.

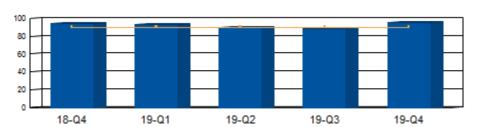

Q4 FY2019 Strategy Performance Indicators Report

Create seamless transitions in care for patients across our regional health-care system

KHSC is fully engaged with our community partners to support patients with complex-acute and chronic conditions

Indicator: Percent of admitted patients with the most responsible diagnosis of hip fracture receive surgery within 48-hours

	Actual	Target
18-Q4	94.0	90
19-Q1	93.0	90
19-Q2	90.2	90
19-Q3	89.0	90
19-Q4	95.0	90

Describe the tactics that were implemented in this quarter to address the achievement of the target:

We continue to follow the pathway and best practice guidelines for patients with a fractured hip as a primary diagnosis. This is a performance target that is monitored closely to ensure that we align with the target. We discuss these cases as they appear on the ED tracker to ensure we are prioritizing for best patient outcomes.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

We are exceeding the 90% target, but will continue to monitor closely so we keep at or above.

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

We met this target and will continue to focus on this metric.

Definition: DATA: Decision Support - Alex Ungar COMMENTS: Christine Wilkinson EVP: Mike McDonald REPORT: STRATEGY INDICATOR

All patients who present to KGH site with a hip fracture and who have been booked for surgical intervention will receive treatment within 48 hours.

The care patients receive while in hospital is typically excellent. However, patients who require different levels of care over an extended period of time in multiple settings often have trouble receiving care across different parts of the health system and at transition points. Communication can be difficult, wait times can be long, and patients and families can feel like they are 'falling through cracks' in the system. we will continue to work with our regional partners and build on the work that was completed last year to standardize the care and order sets used for hip fractures across the SE LHIN.

- Q1 Identify a clear care pathway for all hip fracture patients
 Q2 Ensure that the hip fracture pathway aligns with the Hip Attack Protocol
 Q3 Improved access to the OR for hip fracture patient prioritization
- Q4 All hip fracture patients will have been treated within 48hours either medically or surgically

Target: Target 18/19: 90% Perf. Corridors; Red <60% Yellow 60-84% Green >=85%

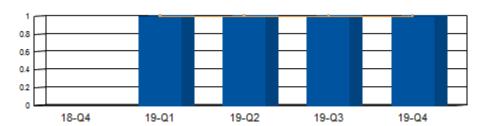

Q4 FY2019 Strategy Performance Indicators Report

Maximize our education, research and academic health sciences potential

The Kingston-wide Health Research Institute is a legally-incorporated entity with charitable status and approved for the purposes of Scientific Research and Experimental Development

Indicator: All required resources are in place at KHSC to support the multisource feedback component of Competency-Based Medical Education(CBME)

	Actual	Target
18-Q4		
19-Q1	1	1
19-Q2	1	1
19-Q3	1	1
19-Q4	1	1

Describe the tactics that were implemented in this quarter to address the achievement of the target:

Each year, Kingston Health Sciences Centre welcomes more than 100 medical residents who spend several years with us, caring for patients at both sites, while completing their training to become full physicians. They are now trained and assessed using a new model called competency based medical education (CBME); Queen's University is the first school in North America to implement it across all of its specialty programs at once. In this new system, residents will be promoted not based on the amount of time they spend in each clinical rotation, but rather when they have achieved competency in the clinical tasks and activities expected of them at each stage of their training. Over the course of last year and this year, KHSC is working together with Queen's School of Medicine to implement the new model, respond to feedback and continuously improve the system. KHSC and Queen's Faculty of Health Sciences are implementing the next phase of multi-source feedback for our residents in the assessment process for CBME. This will include having nursing, allied health and patients providing constructive feedback to the residents that will coincide with their evaluations from the attending physicians.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

CBME is implemented. The Postgraduate Medical Education (PGME) Accreditation, by the Royal College of Physicians and Surgeons of Canada and The College of Family Physicians Canada, of our residency programs at KHSC and Queen's University took place in March of 2018. The feedback accreditors were very positive for how well the CBME has been implemented across all residency training programs.

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

We are currently on track with the implementation of the next phase of CBME, focusing on obtaining feedback from nursing and allied health.

Q4 FY2019 Strategy Performance Indicators Report

Maximize our education, research and academic health sciences potential

The Kingston-wide Health Research Institute is a legally-incorporated entity with charitable status and approved for the purposes of Scientific Research and Experimental Development

Definition: DATA: Chris Gillies COMMENTS: Chris Gillies EVP: Mike Fitzpatrick REPORT: STRATEGY INDICATOR

Canada's medical education system is exceptional, however there are gaps and challenges within the current model that need to be addressed. Currently, we assume that the more time a learner spends on an activity, the more the learner absorbs and excels. Evidence suggests that our methods of training and lifelong learning can be improved — that's where CBME comes in.

- The benefits of focusing on learning instead of time:
 •Ensures competence, but teaches for excellence
 •Supports physicians' skills and abilities to evolve throughout practice enhancing care
 •Responds to changing patient and societal needs
 •Addresses gaps in the current system, like the "failure to fail" culture of resident education
 •Reduces burden on faculties, promoting smoother credentialing and accreditation
 •Increases accountability and promotes transparency in training

- CBME helps specialists:
 •Graduate without knowledge gaps
 •Feel prepared for independent practice
 •Receive timely and effective assessments and feedback
- •Have a clear understanding of the learning objectives of their program

- Maintain needed clinical practice time
 Take a balanced approach to exam preparation
 Understand when new abilities and skills are needed in practice

Each year, Kingston Health Sciences Centre welcomes more than 100 medical residents who spend several years with us, caring for patients at both sites, while completing their training to become full physicians. Last year, together with the Queen's School of Medicine, KHSC implemented the competency-based medical education (CBME) training model. KHSC will work together with providers, teachers, and patients to respond to feedback and continuously improve the system.

Q1: Multi source feedback Plan Phase 1- Implement a process for Nursing to be included in the assessment process of residents, to align with the front line faculty/physician process. Follow up on any recommendation from the PGME RCPSC Accreditation when we receive the final report in Q1

- Q2: Orientation and roll out of new Residents July 2018 for second cohort of residents
- Q3: Multi source feedback Plan Phase 2 Establish a process for Allied Health to be included in the assessment process of residents, to align with the front line faculty/physician process
- Q4: Multi source feedback Plan Phase 3 Establish a process for Patients and Families to be included in the assessment process of residents, to align with the front line faculty/physician process

Target: Target 18/19: 100% Perf. Corridor: Red No = 0, Yellow In progress = BLANK with Yellow Status, Green Yes = 1

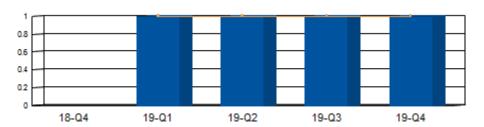

Q4 FY2019 Strategy Performance Indicators Report

Maximize our education, research and academic health sciences potential

The Kingston-wide Health Research Institute is a legally-incorporated entity with charitable status and approved for the purposes of Scientific Research and Experimental Development

Indicator: All legal and operational documents are in place, approved and QHPRI is ready for launch

	Actual	Target
18-Q4		
19-Q1	1	1
19-Q2	1	1
19-Q3	1	1
19-Q4	1	1

Describe the tactics that were implemented in this quarter to address the achievement of the target:

The letters patent for Queen's Health Partners Research Institute (QHPRI) were issued on November 14th, 2017. The three Founding Partners are Queen's University (Queen's), Kingston Health Sciences Centre (KHSC) and Providence Care (PC). Queen's Board of Trustees and the Hospital Boards gave approval to proceed with establishing QHPRI as a non-share capital corporation with charitable status and to develop draft operating, partnership and affiliation agreements to be presented to the Founding Partners for approval by the end of F2019. Pending approval to operationalize the QHPRI, permission was also granted to proceed with developing the documentation necessary to file for Canada Revenue Agency (CRA) accreditation as an approved research institute for the purposes of Federal and Provincial tax credits. This formal partnership between Queen's and the Kingston Hospitals will be the first of its kind in Canada.

At the end of last fiscal, Ernst & Young (EY) and Borden Ladner Gervais (BLG) developed and submitted the CRA application for Advanced Ruling for receiving eligibility status for Scientific Research and Experimental Development (SR&ED) credits. Going this route allowed for us to receive feedback on our draft CRA application to see if it met CRA's requirements for SR&ED. Based on the feedback we received from CRA, an endorsed operating agreement from the Founding Partners was required to be submitted to CRA for final approval for SR&ED.

In Q1, the final draft of the QHPRI operating agreement was completed by BLG and circulated to the Founding Partners for review and endorsement in principal. It is anticipated that the endorsed operating agreement will be submitted to CRA in Q2. The CRA application for charitable status and the Government of Ontario's Ministry of Revenue application for Ontario Business Research Institute Tax Credit (OBRTIC) status still needs to be submitted and is currently being drafted by EY and BLG. We anticipate submission of the charitable application in Q2 and the OBRTIC application in Q3. Other activities planned over the next 6-9 months include developing the organizational structure and employee transition plan (for the core research executive and administration team), finalizing the governance structure, drafting the service level agreements (SLAs) required between the Founding Partners and QHPRI, validating the research support services that will/will not change once QHPRI is operational, creating QHPRI's base budget (and 5-year business plan), and determining the annual contributions from each Founding Partner to QHPRI. Other activities planned include revising the existing affiliation agreement, developing QHPRI's strategic framework, marketing/communications, fundraising, and procurement plans, and preparation for the dissolution of the existing hospital research institutes.

In Q2, the QHPRI operating agreement was ratified and endorsed by the Founding Partners and was submitted to CRA as part of our Advanced Ruling application for SR&ED. We anticipate hearing back from CRA in Q3 in regards to a decision whether QHPRI will be automatically approved for SR&ED federal tax credits or we will be required to submit a formal application for final approval. The OBRITC application will be drafted in Q3 and will be submitted to the Government of Ontario's Ministry of Revenue after our SR&ED approval has been obtained. The CRA application for charity status was drafted in Q2 and we expect the final draft to be circulated to the Founding Partners early in Q3 for approval prior to submission. In Q2 the staffing requirements were defined and options were presented to the Founding Partners for approval (final decision still pending). The Founding Partners also agreed upon a template for collecting the current spend on research and data was collected and validated. The Founding Partners agreed that the current spend would be used to developing the cost sharing of one-time and incremental (new) costs for QHPRI as outlined in the operating agreement. Across the three partners they are currently spending 20 million dollars annually to support research. Cost sharing by the partners was identified at Queen's 78.51%, KHSC 17.88% and PC 3.61%. The draft base budget was presented to the Founding Partners. The final budget and 5-year business plan will be finalized in Q3. The marketing, communications, and branding working group started discussions to develop a communications plan, brand and visual identity for QHPRI, and to develop more efficient and effective internal processes to facilitate better collaboration. Various models for branding have been presented to the Founding Partners (final decision still pending). Finally, draft sub-agreements/SLAs (support services, IP, trademarks, space, asset transfer, affiliation agreement) were developed and will be finalized and circulated to the Founding Partne

In Q3, a number of key activities took place for QHPRI to help keep us on track for operationalization on May 1, 2019: agreement on the inaugural organizational structure for QHPRI (Day 1 and up to Year 5); preliminary discussions related to the employee transition plan for the core research executive and administration team; revisions to the draft governance documents previously circulated back in Phase 2; creation of the service level agreements (support services, intellectual property, trademarks, space, and asset transfer) required between the Founding Partners and QHPRI; validation of the research support services that will/will not change once QHPRI is operational; endorsement of the current spend on health research from each Founding Partners; creation of QHPRI's base budget and 5-year business plan; creation of QHPRI's draft strategic framework; and calculation of the annual contributions (one-time and incremental (new) costs) from each Founding Partner to QHPR based on current health research spend. At the end of Q3, no final decision had been received from CRA regarding our SR&ED status. EY and BLG also created the draft CRA application for charitable status that was circulated to the Founding Partners and they started working on the draft Government of Ontario's Ministry of Revenue application for OBRTIC status.

Q4 FY2019 Strategy Performance Indicators Report

Maximize our education, research and academic health sciences potential

The Kingston-wide Health Research Institute is a legally-incorporated entity with charitable status and approved for the purposes of Scientific Research and Experimental Development

The Founding Partners originally planned to present an update on QHPRI to their respective Board Sub-Committees and Boards in Q4 and proceed for formal approval in the spring 2019 to launch and operationalize QHPRI. In mid-November the Founding Partners decided to pause all working group meetings to discuss next steps in the establishment of QHPRI as currently envisaged. These discussions led to a decision to suspend activities in developing QHPRI as a new separate entity and pursue discussions about reimagining the research partnership between Queen's, KHSC and Providence Care, as a non-incorporated joint venture. This decision emanates from the fact that after significant efforts over the last two years, there remain a number of unresolved issues relating to the operationalization of a separate entity, as well as some existing concerns about the viability of the initiative in the short term. The terms of the joint venture remain to be agreed upon but could involve a memorandum of understanding (MOU) between the Founding Partners with an agreement to continue to participate in joint strategic research planning, collaborative recruitment of research personnel and fundraising for research.

Discussions have also commenced on the due diligence steps required to integrate/amalgamate the two existing hospital research institutes for KHSC: Kingston General Health Research Institute (KGHRI) and Hotel Dieu Hospital Kingston Research Institute (HDHkRI). Recommendations for endorsement of the proposal and the steps involved will be presented to the respective hospital research institute Boards during Q4.

In Q4, discussions continued on the due diligence steps required to integrate/amalgamate KGHRI and HDHkRI. Recommendations for the proposal and the steps involved (three phases) were presented to the KGHRI and HDHkRI Boards for endorsement and approval. A formal decision of the KGHRI and HDHkRI Boards was made to transfer the assets and liabilities (including contract reassignment) from HDHkRI to KGHRI. A tentative date of June 1, 2019 was selected. The dissolution of HDHkRI will be extended approximately six (6) months after the assets and liabilities transfer has occurred to potentially address any unforeseen circumstances where HDHkRI Board approval or signing is required (Phase 1). Phase 2 would be the name change for KGHRI, contract reassignment (KGHRI to new entity name) and other related changes needed to the existing by-laws, membership groups, and expansion of the Board. A potential new name for KGHRI is Kingston Health Sciences Centre Research Institute. Phase 2 would occur 6-12 months after the assets and liabilities transfer from HDHkRI to KGHRI and would require formal Board approvals from KGHRI, HDHkRI, and KHSC. Phase 3 would involve cleaning up, housekeeping and/or other due diligence required to successfully integrate the research institutes and create an arms-length relationship with KHSC. Phase 3 can occur in parallel with Phase 2, if dedicated people and financial resources are made available.

The Founding Partners met in Q4 to start preliminary discussions related to co-branding the informal joint venture partnership. Topics included establishing a Partners Table, Research Executive, Research Council, Memorandum of Understanding/Operating Agreement, and Strategic Framework. Discussions will continue in F2020.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

At the end of Q4, we have implemented all of the revised milestones originally planned for QHPRI. Due to the fact that the Founding Partners of QHPRI have decided to suspend activities in developing QHPRI further as a new separate entity, we revised our milestones to align with reimagining the research partnership between Queen's, KHSC and Providence Care as a more informal joint venture.

The informal joint venture will continue to support growth and success in key areas of research, facilitate the recruitment and retention of top-notch clinical and non-clinical scientists, as well as the brightest students, and trainees and allow us to continue to be a major contributor to the sustainability of health research in Kingston. Queen's and the Kingston Hospitals have a long history of research collaboration but in today's competitive research landscape, the need for strategic partnerships that go beyond traditional research collaborations has become essential. To continue to produce world-class, collaborative research academic health sciences centres need to evolve and come together to ensure competitiveness and sustainability, advance innovation, transform and intensify research prominence, and have an impact on health systems.

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

Yes, we have met our revised targets at year-end.

Q4 FY2019 Strategy Performance Indicators Report

Maximize our education, research and academic health sciences potential

The Kingston-wide Health Research Institute is a legally-incorporated entity with charitable status and approved for the purposes of Scientific Research and Experimental Development

Definition:

DATA: Veronica Harris-McAllister COMMENTS: Veronica Harris-McAllister EVP: Roger Deeley REPORT: STRATEGY INDICATOR

Creation of QHPRI would have a positive impact on health research in Kingston by attracting and retaining top research talent (scientists, staff, students, trainees), growing research revenues, increasing operational efficiency, streamlining governance and integrated strategies, and sustaining the research missions of all three founding partners.

QHPRI will be dedicated to building innovative partnerships and pursuing research excellence through a collaborative approach that leverages the combined strengths of its founding partners (Queen's University, Kingston Health Sciences Centre, and Providence Care). The founding partners have a long history of research collaboration, but in today's competitive research landscape, the need for strategic partnerships that go beyond traditional research collaborations has become essential.

Milestones: Q1 (April-June 2018): Submission of applications to CRA for SR&ED, charitable and OBRITC status completed. Draft operating agreement completed and circulated to founding partners for review.

Q2 (Jul-Sep 2018): Approval from CRA for SR&ED, charitable and OBRITC status obtained. Language in operating agreement finalized. Existing Affiliation and Intellectual Property (IP) agreements revised and circulated to founding partners for review. Draft service level agreements (SLAs) completed and circulated to founding partners for review. QHPRI operational planning and governance structure completed.

Q3 (Oct-Dec 2018): Language in Affiliation and IP agreements finalized. Language in SLAs finalized. QHPRI strategic plan (including identified research themes/programs) completed. Presentation to founding partners' board committees and boards for endorsement to proceed to operationalize QHPRI occurred.

Q4 (Jan-Mar 2019): QHPRI marketing & communication plan completed. Founding partner boards (KHSC, PC and Queen's Trustees) provide approval to proceed to operationalize QHPRI. QHPRI inaugural Board of Directors and Research Advisory Council identified.

Target: Target 18/19: 100% Perf. Corridor: Red No = 0, Yellow In progress = BLANK with Yellow Status, Green Yes = 1

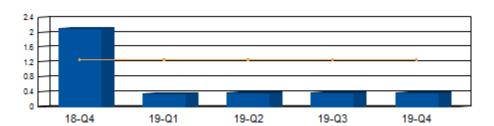

Q4 FY2019 Strategy Performance Indicators Report

Contribute to and support a high-performing regional health-care system with our partners

KHSC is part of an integrated and sustainable regional health-care system

Indicator: KHSC achieves \$1.25 million of integration-related savings

	Actual	Target
18-Q4	2.10	1.25
19-Q1	0.34	1.25
19-Q2	0.37	1.25
19-Q3	0.37	1.25
19-Q4	0.37	1.25

Describe the tactics that were implemented in this quarter to address the achievement of the target:

As part of our business case for integrating KGH and HDH to form our new Kingston Health Sciences Centre, we targeted a financial savings of \$3.7 million over three years This was year 2 of integration, and we have streamlined our operations and key business areas. We conducted an IT systems review that will help us to harmonize our corporate information systems such as payroll, human resource and financial management systems. And, we will continue to review our departments and processes across both sites to identify additional opportunities to integrate our corporate services and find operational efficiencies. An Integration Systems Steering Committee is in place and is guiding the review of the business systems integration. A budget review for 2019/20 has been initiated, and departmental integration review will be part of the budget review process.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

Goal for this year achieved

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

Yes, on track to meet \$1.25M target by year end.

Definition: DATA: Amit Bansal COMMENTS: Amit Bansal EVP: Troy Jones REPORT: STRATEGY INDICATOR

As part of our business case for integrating KGH and HDH to form our new Kingston Health Sciences Centre, we targeted a financial savings of \$3.7 million over three years. This year, we are aiming to achieve \$1.25 million of those savings by streamlining our operations in a few key areas. This year we will continue the work to harmonize our corporate information systems such as payroll, human resource and financial management systems, as well as continue to review our departments and processes across both sites to identify additional opportunities to integrate our corporate services and find operational efficiencies.

Target: Target 18/19: 100% Perf. Corridor: Red No = 0, Yellow In progress = BLANK with Yellow Status, Green >=\$1M savings.

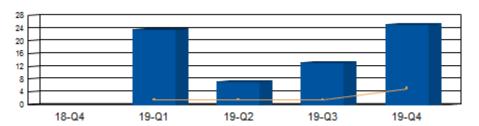

Q4 FY2019 Strategy Performance Indicators Report

People

Empower our people and patient partners to improve the patient experience

Indicator: Percent of vacancies at KHSC

	Actual	Target
18-Q4		
19-Q1	23.5	2
19-Q2	7.0	2
19-Q3	13.0	2
19-Q4	25.0	5

Describe the tactics that were implemented in this quarter to address the achievement of the target:

45 nursing students participated in three "A night with the clinical VPs" events demonstrating the accessibility of our top Nursing executive and our commitment to new graduate talent;
In November 2018 KHSC conducted four information sessions at St Lawrence College and Queen's University for RN students; one session at each

institution for 4th year students with strong participation, and for the first time, a second session at each institution for 2nd and 3rd year RN students which was well received:

Participation in 14 career events with a targeted focus on high volume, hard to fill nursing areas (medicine, critical care and the operating room) Highlights included a novel on-site "speed" interview of RN students where each student participated in 15 minute interviews with three different Managers and continued participation in broader non-nursing career fairs (e.g. the Mitchner Instiln collaboration with the perioperative program an information session with a spotlight on nursing in the operating room attracted 23 current nurses with potential interested in pursuing work in this hard to fill area.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

In Q4, there was a 25% decrease in the number of vacancies at KHSC which exceeds the target of a decrease of 5%.

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

The target was met.

Definition:

DATA: Chris Garnett COMMENTS: Chris Garnett EVP: Sandra Carlton REPORT: STRATEGY INDICATOR

The objective is to decrease the number of outstanding vacancies within KHSC by 5%. Our outstanding vacancies have risen over the past two years. Our goal is to closely monitor the number of vacancies as well as employ strategies to increase the conversion rate of consolidation students to KHSC employees and attract outside talent.

We believe that creating a workplace where people feel empowered will improve the patient experience at KHSC. This year, we will continue our work on improving staffing and recruitment models. These improvements are consistent with building trust, driving engagement, improving employee morale and supporting more nimble decision-making, role clarity, efficiency and potential for innovation. We believe that we will also achieve a decrease in overtime costs related to posting schedules with many vacancies at the time of posting.

Milestones:
Q1: 1. "Touch basis" with 4th year consolidation students 2. Review reference check process 3. Participate in 2 "end of season" career fairs 4. Q2: 1. "Touch basis" with 4th year consolidation students 2. Review reference check process 3. Farticipate in 2 and of season career rails 4. Decrease of 1.5%

Q2: 1. "Touch basis" with 4th year consolidation students 2. Semi-annual focused recruitment mtgs with bottom 10 departments 3. Decrease

of 1%

1. "Touch basis" with 4th year consolidation students 2. Engagement events "nights" at SLC & Queens for 1st & 2nd year students 3. Participate in 3 career fair events 4. Decrease of 1.5%

Q4: 1. "Touch basis" with 4th year consolidation students 2. Participate in 6 career fair events 3. Semi-annual focused recruitment mtgs with 4th year consolidation students 2. Participate in 6 career fair events 3. Semi-annual focused recruitment mtgs with 4th year students 5. Decrease of 1%

Target: Target 18/19: 5% annual reduction [225 Benchmark - 5%(11 or ~3/qtr) = 214] Perf. Corridors: Red <0.5% reduction Yellow 0.5% - 1.0% reduction Green >= 1.5% reduction

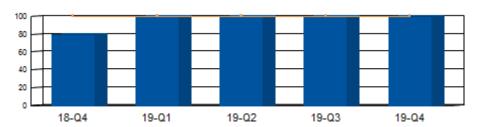

Q4 FY2019 Strategy Performance Indicators Report

Technology

Rapid transmission of information improves care & operational efficiency

Indicator: Strategic Technology project plans meet quarterly milestones

	Actual	Target
18-Q4	80	100
19-Q1	100	100
19-Q2	100	100
19-Q3	100	100
19-Q4	100	100

Describe the tactics that were implemented in this quarter to address the achievement of the target:

Keeping pace with emerging technology is essential in the business of health care. This year, we are working with our regional hospital partners to complete the procurement of a regional Hospital Information System in order to strengthen our health care delivery in southeastern Ontario; continuing our partnership with the SE LHIN on the electronic workflow and communications with community care partners; and enabling technologies to support our Kingston Health Sciences Centre integration by consolidating core IT infrastructure and executing back-office business systems projects for Finance, People Services and Missions, Strategy and Communications.

The regional HIS project continues to make good progress. The RFP document was approved by the HIS Advisory Committee and posted on February 7, 2019 for public response. Proponents participated in a mandatory meeting and had an opportunity to pose questions to support their final submissions, which are due April 25, 2019. The first and second stages of the evaluation phase have been finalized for May and June and individuals across the region have been identified as evaluators by the Advisory Committee. Preparation is well under way for the final stages of the evaluation phase in September and October. Multiple awareness and engagement presentations have been completed at partner hospitals for leadership, clinician and patient groups. Results of the evaluation phase are expected to be finalized in the Fall of 2019 with an approval process to follow.

eReferral Automation Project - complete (live September 2018).

The systems integration priority focuses on supporting the identification, planning and execution of KHSC Business Systems projects for Finance, People Services and Missions, Strategy and Communications as well as the consolidation of core IT infrastructure. As of the time of this report, 9 business systems integration projects have been approved. Of the 9 projects, 5 projects have been completed and 4 are in progress. Of note this quarter, the Human Resource Information System (HRIS) integration project is aligning its implementation strategy with the completion of the collective agreement negotiations and the Patient Billing project completed Phase I automating eAmbulance home health care notification and investigation of automation options to integrate the HDH and KGH billing processes.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

Within the Corporate Strategy program, 3 of the 3 projects are green indicating progress is on schedule and budget.

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

We are currently on track to meet the delivery targets for 3 of the 3 strategic projects by year end. The HIS and Systems Integration projects will continue into the next fiscal year due to their size and number.

Definition: DATA: John Coleman COMMENTS: Valerie Gamache-O'Leary EVP: Troy Jones REPORT: STRATEGY INDICATOR

This tactic will ensure that the project delivery for the 3 strategic technology projects are initiated, planned, executed and closed according to KHSC

Keeping pace with emerging technology is essential in the business of health care. This year, we are working with partners to explore a regional Health Information System in order to strengthen our health care delivery in southeastern Ontario; continuing our partnership with the SE LHIN on the electronic workflow and communications with community care partners; and harmonizing back-office business systems such as Finance, Payroll, Human Resources and web communications.

Q1: HIS - Assemble core team; eReferral - testing signed off; BSI - Safe Reporting Live
Q2: HIS - Complete Primary and Community Care engagements; eReferral - education launched + pilot group Live; Intranet - KHSC Site Live
Q3: HIS - Issue Regional HIS RFP (late Q3); eReferral - fully live and project closed

Q4: HIS - Finalize vendor selection

Target: Target 18/19: 100% Perf. Corridor: Red <33%, Yellow 60% to 79%, Green >= 80%.

Prior Targets: Target 17/18: 100% Perf. Corridor: Red <60%, Yellow 33% to 66%, Green > 66%.

9 The Phase 2 redevelopment design process is underway

Indicator: Required steps in the procurement process meet quarterly milestones

	Actual	Target
18-Q4		
19-Q1		1
19-Q2	0	1
19-Q3	0	1
19-Q4	0	1

Describe the tactics that were implemented in this quarter to address the achievement of the target:

The Memorandum of Understanding with Infrastructure Ontario was approved by the Board of Directors in November. Discussions continue with the MOHLTC, specifically related to the new ED space benchmark, to advance approval to proceed with Stage 3 planning

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

Q2, Q3 and Q4 activities to procure the Planning, Design & Compliance Team and begin design cannot proceed without MOHLTC approval.

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

No. MOHLTC approval is required in order to proceed with procuring the services of a Planning, Design & Compliance Team. Procurement will take at least 3 months and therefore the target cannot be achieved by year end.

Definition: DATA: Krista Wells COMMENTS: Krista Wells EVP: Troy Jones REPORT: STRATEGY INDICATOR

Existing ER, Surgical Suite, NICU, Labour & Delivery, Clinical labs and the Data Centre do not meet current design standards (CSA- Z8000) and must be replaced.

Safe, modern facilities are essential for leading-edge acute care, research, and teaching hospitals. In Phase 1 of our hospital redevelopment project, we added 170,000 square feet of new space and renovated an additional 143,000 square feet at our KGH site. Phase 2 includes plans for a brand new neonatal intensive care unit, labour and delivery facilities, labs and operating rooms.

Milestones:

Q1: Execute Memorandum of Understanding with Infrastructure Ontario
Q2: Co-Sponsor the procurement of Planning, Design, Compliance Team (led by Infrastructure Ontario)
Q3: Co-Sponsor the procurement of Planning, Design, Compliance Team (led by Infrastructure Ontario), Begin development of Project Specific Output Specifications

Q4: Continue development of Project Specific Output Specifications

Target: Target 18/19: 100% Perf. Corridors: Red No = 0 Yellow In progress = BLANK with Yellow Status Green Yes = 1

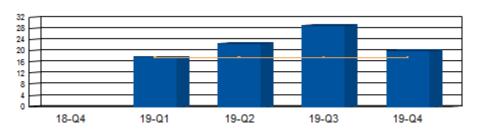

Q4 FY2019 Strategy Performance Indicators Report

Finance

KHSC is a top operational performer amongst Ontario teaching hospitals

Indicator: The operational budget is balanced, and the capital spending capacity achieved is \$17.5 million

	Actual	Target
18-Q4		
19-Q1	17.7	17.5
19-Q2	22.5	17.5
19-Q3	29.0	17.5
19-Q4	20.0	17.5

Describe the tactics that were implemented in this quarter to address the achievement of the target:

The identification of additional operational efficiencies, Integration related savings, and support from UHKF assisted in increasing the level of internally generated (i.e. excluding HIRF funding) capacity for capital expenditure investment.

Explain the current performance of the target. Where possible, translate statistics and numbers into plain language, focusing on the impact to patients and staff:

This level of capital spending exceeds the prior year level of investment capacity.

Are we on track to meet the target by year end? If not, what new tactics are planned to ensure the target is met?

Yes on track

Definition:

DATA: Amit Bansal COMMENTS: Amit Bansal EVP: Troy Jones REPORT: STRATEGY INDICATOR

There is a gap between the current level of hospital funding and the amount estimated as required to balance the operational budget and sustain the current level of capital spending capacity.

Hospitals are required to achieve a surplus financial position in order to address the ongoing need for replacement of patient care related equipment, technology and facilities infrastructure.

- Q1: Review of Fiscal 2019 funding allocation; ability to direct funds to increase capital spending capacity
- Q2: Review of overall fiscal results; requirement to action items to facilitate increase in capital spending provision Q3: Review of overall fiscal results; requirement to action items to facilitate increase in capital spending provision Q4: Review of overall fiscal results; requirement to action items to facilitate increase in capital spending provision

DATA: Steve Miller COMMENTS: Steve Miller EVP: Steve Miller REPORT: STRATEGY INDICATOR

We must increase donation revenue in order to fund the Phase 2 local share. Employees play a crucial role in engaging and inspiring community members to donate to our campaign. Delivering personalized direct communication about opportunities to give to the campaign to employee will enable them provided the place of community campaign donations to the successful completion of the Phase 2 project.

Our Phase 2 redevelopment project will enhance our ability to fulfill our role as the region's complex-acute and specialty care provider. However, before any construction can begin, the Ministry of Health and Long-Term Care must be satisfied that KHSC will be able to meet its 'local share' of the costs, and this is where the support of our internal and external community is vital. Work is underway through the University Hospitals Kingston Foundation to ensure the necessary funds can be raised in the next few years and they are counting on KHSC leaders and employees to lead the way. If all goes well on this front, Phase 2 redevelopment construction could begin as early as 2020.

Milestones

- Distribute personalized information packages and sign-up forms to all current full time and regular part-time employees. Follow up distribution with letters of confirmation and thanks to donors. Resolicitation of non-responders by group email. Announce and celebrate campaign results.
