

CODE ORANGE

(External Disaster)

Information on an external disaster (mass casualty incident) is received by the Emergency Department

ED Charge Nurse and Physician determine the need for a Code Orange Standby using the “Code Orange Notification Record”
See page 7

Code Orange not required

**“Code Orange Standby”
initiated**

Communication of “Code Orange Standby” provided to key stakeholders and leadership via Mass Notification System (MNS). Decision of whether or not to proceed to Code Orange Activation made within 30 minutes

“Code Orange Standby” stood-down

**“Code Orange Activation”
initiated**

- Code Orange announcement made overhead at KGH and HDH sites
- ED Incident Command Centre (ICC) established
- Corporate Emergency Operations Centre (EOC) established
- Communication to stakeholders and leaders provided
- All staff refer to page 17

Code Orange response and recovery completed

**“Code Orange All Clear” announced overhead
and through MNS**

- This page left blank intentionally -

1. Code Orange Process

1.1. Background

A mass casualty incident (MCI) within our community will generate a sudden surge in patient arrivals to the emergency department (ED) and/or Urgent Care Center at Kingston Health Sciences Center (KHSC). The goal of the plan is to provide guidance to providers such that KHSC has a pre-planned and coordinated response to the surge.

1.2. Code Orange Response Overview

The Code Orange is an institutional response to a multi-casualty incident that aims to:

- Describe the leadership hierarchy during disaster situations
- Outline key roles and responsibilities for staff
- Suggest key strategic considerations and directions for the response
- Identifying internal and external resources to support the response
- Support the transition to “normal business” operations as soon as possible

The Code Orange response will be focused in the Emergency Department, as casualties are expected to be received there. The remainder of the organization will need to focus efforts towards creating capacity in the ED for arriving patients and sustaining it as patients are assessed and move to Operating Rooms, the Intensive Care Unit, and other inpatient care units.

The organizational structures for the KHSC response to a disaster are outlined on **Page 12** (Emergency Department Incident Command Structure), **Page 15** (KHSC Emergency Operations Committee Incident Command Structure), and **Page 16** (Critical Care Incident Command Structure). The structures follow a **Bronze**, **Silver**, and **Gold** hierarchy within the Incident Command Teams. Every Code Orange activation will trigger the ED Incident Command Center as well as activation of the Emergency Operations Center Incident Command team and the designation of Bronze and Silver level leadership positions

If the incident is a Chemical, Biological, Radiological, or Nuclear (CBRN) event the structure of the response varies somewhat and is described in Appendix D

1.3. Decision Process to Activate the Code Orange Plan

The initial and most challenging decision in an evolving disaster scenario is the decision to activate the Code Orange plan. Our experience with previous MCIs has been that in the early stages of such incidents there is usually only limited, confusing, and potentially misleading information available. We anticipate that the first information on such incidents will appear on “Social media” (Twitter, Facebook, News websites, etc.) and via informal communications and that there is potential for significant confusion and anxiety during this phase. It often takes some time – frequently over an hour, before any sort of reliable information is available to front line staff. The plan is written with those challenges in mind, and is the reason we have a Code Orange “Standby” alternative to a full Code Orange activation.

The Emergency Department Charge Nurse and Section “A” Attending Emergency Physician will obtain information on the incident from the Kingston Central Ambulance Dispatch “Multi-Casualty Incident (MCI) Desk” or the Duty Supervisor to complete the Code Orange Notification Document. Upon completion of this document the Emergency Physician and the Charge Nurse will determine appropriate response (No Code Orange, Code Orange Stand-by or Code Orange Activation). If they are uncertain, they will contact the Emergency Medical Director and /or Department Head for advice.

1.3.1.KHSC Code Orange Activation Process Algorithm

Emergency Department (ED) notified of potential mass casualty incident

“Section A” Attending Emergency Physician/Charge Nurse to:

1. Contact Kingston Central Ambulance Dispatch and ask to speak to “Multi-Casualty Incident (MCI) Desk” to obtain information on incident. If MCI desk has not been established then “Duty Supervisor”.
2. Request all information needed to complete Code Orange Notification Document (**Page 7**)
3. Emergency Physician and Charge Nurse determine appropriate response (1, 2 or 3). If uncertain, contact Emergency Medical Director and/or Department Head for advice.

1. Not a Code Orange

Not a MCI or ED resources are adequate for event.

De-escalation

2. Code Orange Standby

There is a reasonable probability that the MCI will overwhelm existing ED/hospital resources but further information is desired (and expected to be available shortly) before a decision to activate the Code Orange can be made.
MNS text to designated leaders for awareness

Escalation

3. Code Orange Activation

Confirmation that an MCI of sufficient magnitude to overwhelm existing ED /hospital resources has occurred.

ED and EOC Incident Command teams activated

See Page 9 for Standby Processes.

Daytime hours:

1. **ED Attending or Charge RN** contacts Switchboard (x4444) and requests “Code Orange Standby” activation via the Mass Notification System
2. **ED Charge RN** contacts ACO, OR Nursing Manager, Security Supervisor, ICU, D4ICU, and HDH UCC Charge Nurses
3. **ED Attending** contacts HDH UCC Attending, On-Call TTL, On-Call Emergency Physician, and Anesthesia Attending

Evenings, Weekends, Holidays:

ED Attending, Charge Nurse, ACO initiate fan-out

All hours

ED Attending or Charge RN contacts:

Switchboard (x4444) AND Security (x4142)

Request “Activate Code Orange”

Staff Response

All staff refer to Page 17: “What should I do?”
If CBRN event refer to Appendix D

1.4. Completion of Code Orange Notification Record

There are several purposes to this document. First, is to provide a template to collect all critical information, as it becomes available during a MCI. Second, is to provide a consistent method of communication between the many personnel, services, and departments engaged in the response. Third, is to provide a clear record of information provided from the scene during the incident, which is very helpful in debriefing exercises. The document should be seen as a “live document” that can be updated throughout the response. Copies of the most recent version should be shared between teams.

1.4.1. **Code Orange Notification Record** - (Please fill in completely – copies can be provided to Incident Command team)

Name of Staff Completing:

Charge Nurse: _____

Section “A” Physician: _____

Date / Time: _____

Name of Call taker or Supervisor at CACC MCI desk: _____

Phone #: _____

Description of Incident:

Location of Incident: _____

Number of Patients: _____

Red: _____ Yellow: _____ Green: _____ Black: _____

Expected Time of Arrival: _____

CBRN event: Yes: _____ No: _____

Other Comments (consider whether the incident will overwhelm existing resources):

Decision: No Code Orange _____
Code Orange Stand-by _____
Code Orange Activation _____

1.5. Code Orange “Standby”

The “Code Orange Standby” is used in the situation where the ED has received information on an evolving (or potential) MCI but the available information does not appear consistent, reliable, or convincing that the patient volumes (or acuity) related to the incident would overwhelm existing ED and/or inpatient resources.

The “Standby” alert is an opportunity to provide available information on a potential or evolving MCI to key Departments/Programs and Administration so that institutional resources can be quickly assessed and an appropriate response initiated if the event is subsequently confirmed to be a substantial MCI, requiring a full Code Orange activation.

The Standby notification process is slightly different during regular business hours and after-hours (evenings, weekends, and holidays). During the former time period, Switchboard can assist in the notification process using the electronic Mass Notification system to provide both a text and email to designated Department /Programs and Administration providing them with awareness that Code Orange “standby has occurred” . After hours this is not possible due to the rotating and frequently changing call schedules.

After hours, notifying “On-Call” personnel of the “Code Orange Standby” is the shared responsibility of the Attending ED Physician(s), Charge Nurse, Administrative Coordinator, and Security with assistance from Switchboard. **Page 9** represents an overview of how to initiate the notification, who to notify, and what to tell them. It may be convenient to print several copies of this to track calls made.

The Code Orange Standby should either be escalated to a full Code Orange response or de-escalated (stood-down) as soon as sufficient information to make this decision is made but ideally within thirty minutes of the Standby being initiated.

1.6. Code Orange Activation

MCI events for which reliable information has been received to confirm that ED and/or inpatient resources will be overwhelmed with the anticipated number or severity of casualties should prompt the full Code Orange Activation response rather than the Standby.

The Attending ED Physician and Charge Nurse have the authority to activate the Code Orange plan based on their assessment of current ED capacity, understanding of current inpatient resources, and the available information on the MCI event. This decision should be discussed and agreed upon by both parties. When Code Orange Activation occurs; both the ED and KHSC EOC Incident Command teams are established. (Page 9-11)

1.7. Code Orange Overhead Notification

For a Code Orange Standby there will be no overhead notification. Switchboard will assist ED staff, the Operations Manager (ACO), and Security in the notification awareness process to designated Departments/Programs and Administration.

For a Code Orange Activation, Switchboard will make the following announcements at the two sites:

- **KGH site:** “Code Orange: Emergency Department” (three times)
- **HDH site:** “Code Orange KGH site” (three times)

Code Orange Standby Notification Processes		
Type/time of Day	Notification Process	Information to provide, regardless of type/time of day (as applicable to role)
Weekday, daytime hours	<p>Switchboard (via the mass notification system) to notify:</p> <ul style="list-style-type: none"> • Operations Manager (ACO) • Chief of Staff • ED Medical Director • ED Program Director • ED Program Operational Director and Nursing Managers • Emergency Medicine Department Head • Trauma Program Medical Director • OR Manager/Director • ICU Manager/Director • Director Patient Flow, Registration and Health Information Services • Environmental and Transport Services Director • Protection Services Director/Managers • Senior Administration (VP level) • HDH UCC Manager • Core Lab Manager / Director • Diagnostic Imaging Manager/ Director • Pharmacy Administration Team (kghpharmadmin@kingstonhsc.ca) • Director Strategy Management & Communications <p>ED Attending Physician to notify:</p> <ul style="list-style-type: none"> • HDH UCC Attending, On-Call TTL, OR Anesthesia Manager (x7071), On-Call ED Physician <p>ED Charge Nurse to notify:</p> <ul style="list-style-type: none"> • Switchboard, Operations Manager(ACO), OR Nursing Manager (x7070), Security Supervisor, ICU, D4ICU, HDH UCC Charge Nurses & ED Respiratory Therapist 	<p>Very brief description of incident.</p> <p>Do <u>not</u> come to the ED.</p> <p>If shift change approaching, do not dismiss any staff.</p> <p>Do not start any non-emergent procedures or tests that cannot be completed within a matter of minutes.</p> <p>Assess your unit or department's resources to deal with the potentially expected number of casualties.</p> <p>Identify patients who could be moved to hallways, sunrooms, or other care locations.</p> <p>Determine staffing resources – those who could stay late, could be called in, or moved to other care locations.</p>
After-hours - Evenings, Weekends, Holidays	<p>ED Attending Physician to notify:</p> <ul style="list-style-type: none"> • HDH UCC Attending and On-call Emergency Physician • Trauma Team Leader and OR Anesthesia Manager (x7071) • Emergency Medicine Department Head/Medical Directors <p>ED Charge Nurse to notify:</p> <ul style="list-style-type: none"> • Switchboard, OR Nursing Manager (x7070), Security Supervisor, ICU, D4ICU, HDH UCC Charge Nurses & ED Respiratory Therapist <p>Operations Manager (ACO) to notify:</p> <ul style="list-style-type: none"> • Administrative Director On Call (Duty Admin) <p>And authorize Switchboard to Notify:</p> <ul style="list-style-type: none"> • Strategy Management & Communications On Call • Manager/Supervisor of Core Lab, Blood bank, Environmental and Transport Services • Delegated Pharmacy Manager (x3154) when pharmacy is open or On Call Pharmacist <p>Security to notify:</p> <ul style="list-style-type: none"> • Shift/Duty Supervisor, Security Managers, Director Protection Services 	<p>Review Code Orange plan</p> <p>Expect an update within 30 minutes and a decision to escalate or de-escalate response at that time.</p>

- This page left blank intentionally -

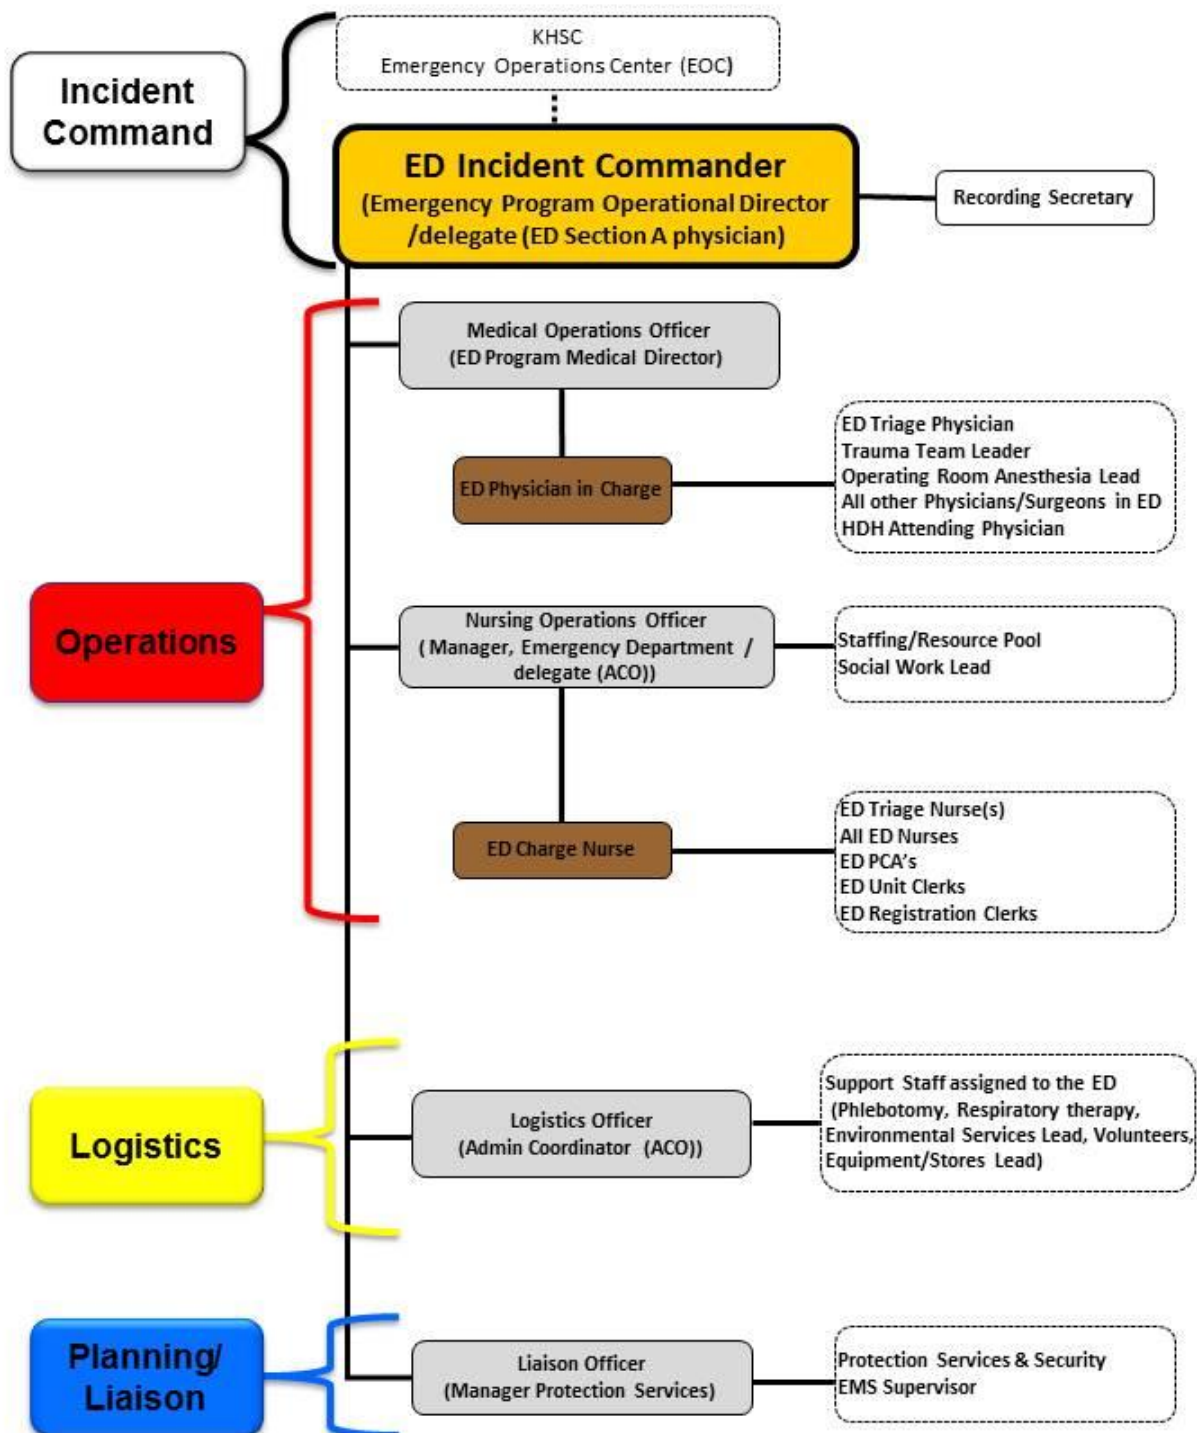

1.8. Code Orange All Clear

The KHSC EOC Incident Commander with the input and support of the other Incident Command team members and with the agreement of the ED Incident Command team will make the decision to stand-down the Code Orange (All Clear) once it has become clear that institutional resources have become adequate to support the patient surge.

The KHSC EOC Incident Commander will direct switchboard to make the following overhead announcement at both KGH and HDH sites: **“Code Orange, All Clear”** (three times).

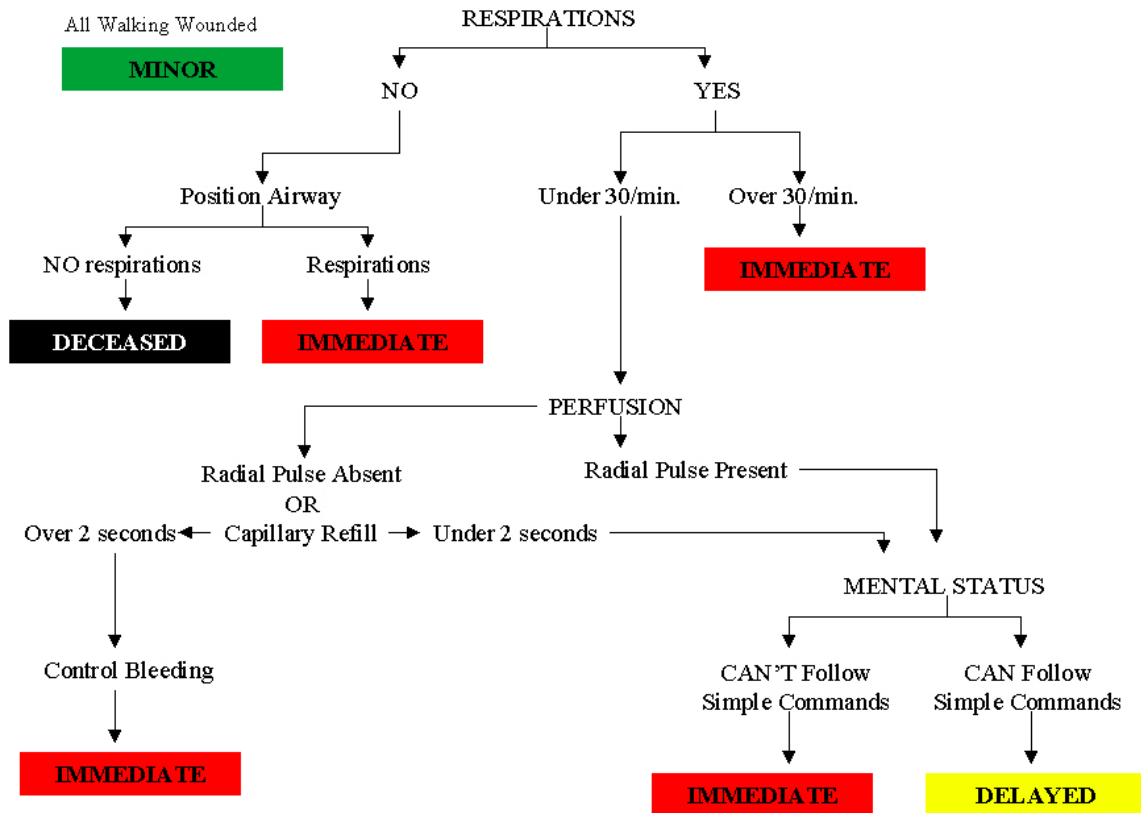

The Incident Command teams will organize a “Hot Debrief” of the incident and communicate this via KHSC e-mail, Vocera, mobile phones, etc. to parties who are requested to attend. A formal debrief of the Code Orange incident will be organized with members of both the ED Incident Command Team and the KHSC EOC Command Team.

1.9. Emergency Department Incident Command Structure

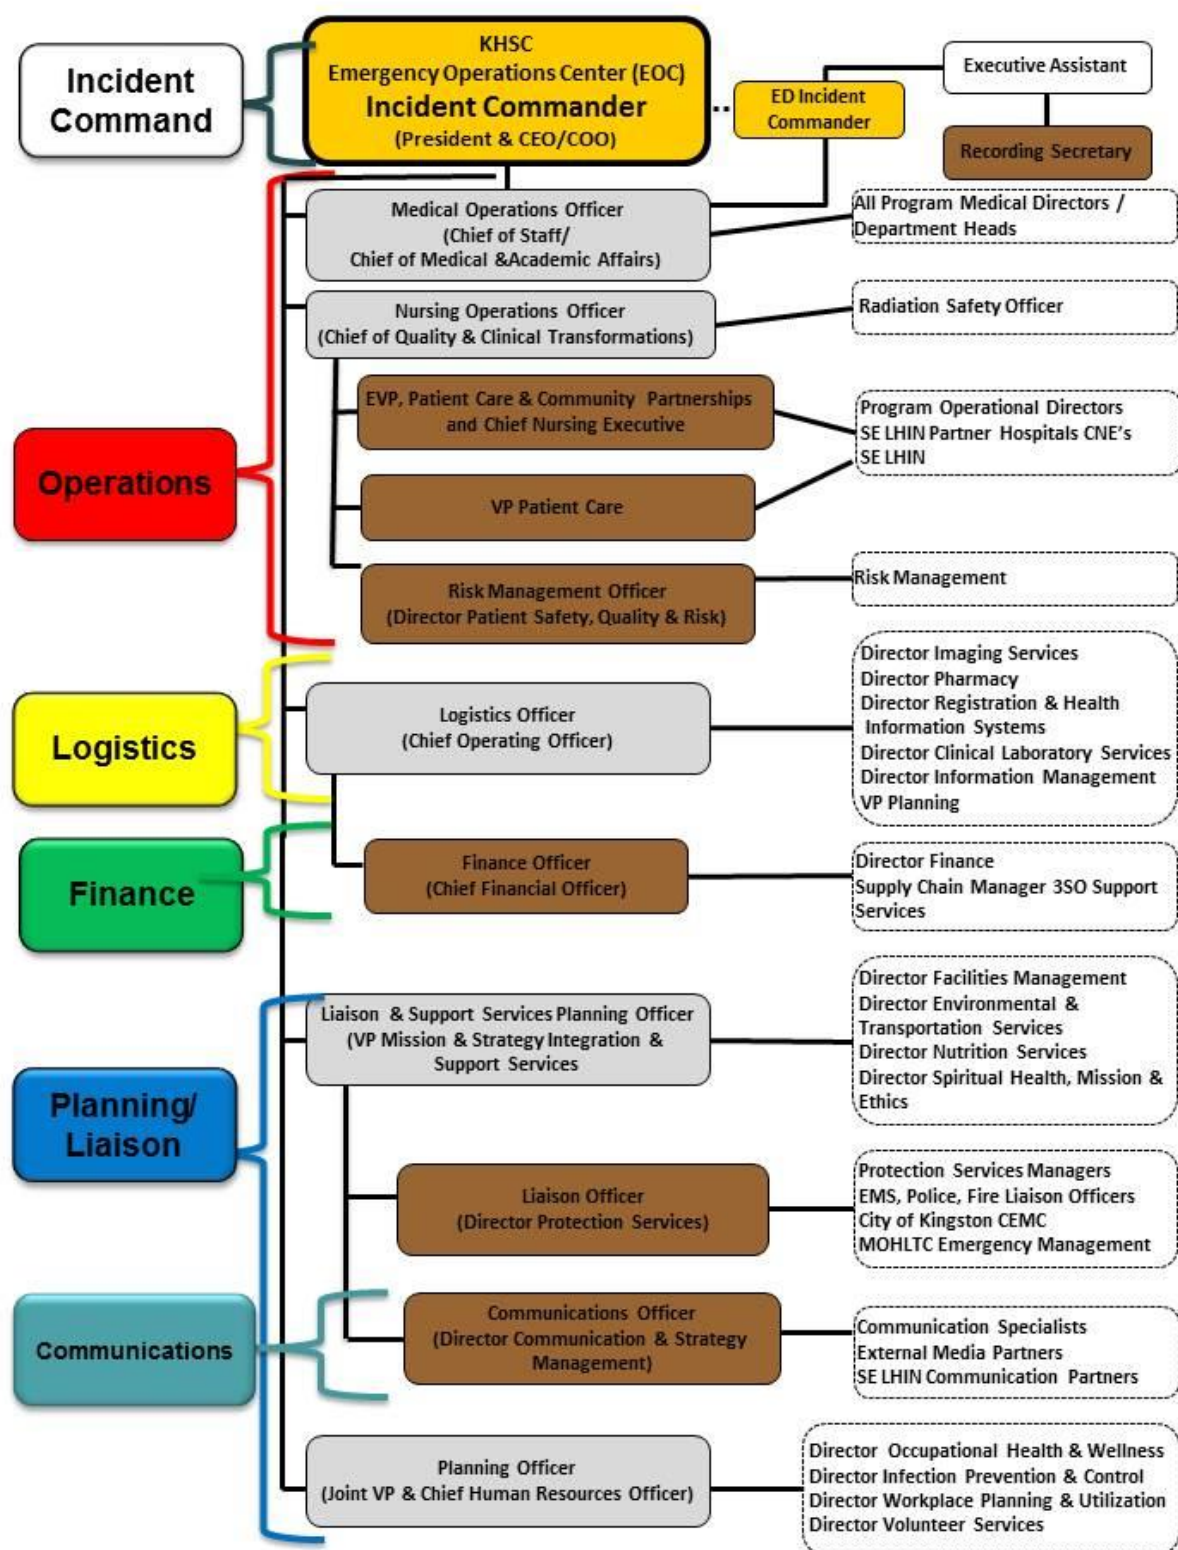

1.10. Overview of Emergency Department Staff Response to Code Orange Activation

- ☐ Reference Page 12 and then assign Bronze and Silver-level leadership roles
 - Note that an individual may be qualified to assume several roles in the response (e.g. Trauma Team Leader and Medical Operations and Planning Officer). In this situation the most senior ranking person should assume the highest-level role they are qualified to undertake and then delegate other roles (i.e. assure Silver roles are covered first and then delegate other roles).
- ☐ Review Job Action Cards specific to assigned roles (Refer to Table of Contents).
- ☐ Set up the ED Incident Command Center in the office of the Director of Ambulatory and Emergency Program (Room #)
- ☐ Create capacity in the ED for incoming casualties according to the following guidelines:
 - Admitted patients
 - Any admitted patient should be immediately transferred to their designated or an otherwise appropriate bed (or care location) regardless of whether or not their bed is “ready”
 - Receiving units will send staff to the ED to collect patients and transfer them to inpatient units
 - All admitted patients should be decanted from the ED within 30 minutes of the Code Orange being activated
 - Non-admitted patients
 - Patients referred to consulting services will have disposition decisions made within 30 minutes of Code Orange activation. Attending Physicians from consulting services are expected to respond to the ED immediately to disposition patients to inpatient units (where admission orders can be completed) or discharge them.
 - ED physicians will rapidly triage and disposition patients under their care.
 - An Attending ED Physician will work with the Triage Nurse to triage patients in the waiting room and suggest low-acuity patients seek care at the HDH Urgent Care Center, their Family Doctor’s office, or a Walk-In clinic
- ☐ Establish and Staff a decontamination area if a CBRN/HAZMAT event has occurred
 - Patients should be decontaminated on scene prior to transport to hospital
 - Patients requiring decontamination should receive this before they are triaged
 - Security/Nursing will set this up under the canopy on the ED ramp Area
- ☐ Establish a Triage area
 - This should preferably be located under the ED canopy before patients enter the ED
 - There will be one ED Triage Physician and one ED Triage Nurse assigned to this zone that are supported by additional Resident Physicians and Nurses as necessary
 - Patients should be triaged according to the START Triage Method and directed to Care Areas as per below

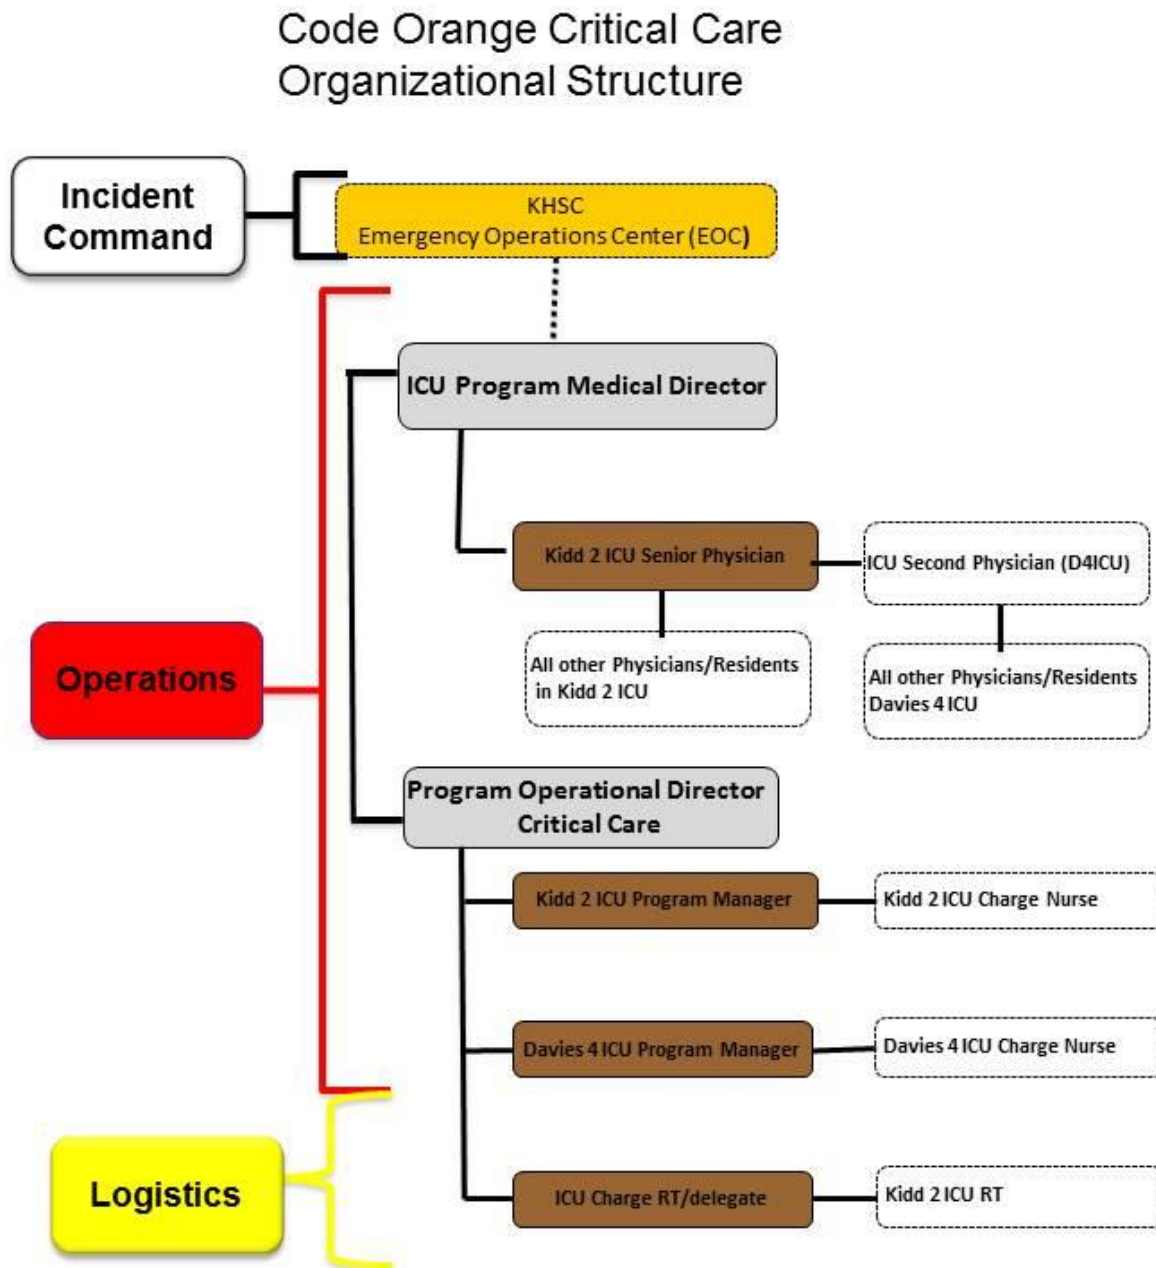

Triage category	Care Area
Red	Section A, D
Yellow	Section B
Green	Burr 1 Gym
Black	Douglas 1 Morgue

1.11. KHSC Emergency Operations Centre Incident Command Structure

1.12. Critical Care Incident Command Structure

1.13. Code Orange Activation: Leaders- “What should I do?”

If you hear a “Code Orange” called overhead, all Leaders should do the following:

- Do NOT go to the ED
- Refer to the Code Orange plan
 - Report to the Emergency Operations Center (EOC) located in the Dietary 3 Boardroom if you are a member of the EOC (refer to Page 15 – KHSC Emergency Operations Centre Incident Command Structure)
 - Check Table of Contents to see if there is a specific action card (detailed list of specific tasks required) for your role within the organization
 - If your role is not listed, then refer to Page 17 for expected actions by Department / Service, or Staff group within KHSC
- Assess resources in preparation to assist as required for Code Orange response

1.14. Code Orange Activation: Staff -“What should I do?”

If you hear a “Code Orange” called overhead, all staff should do the following:

- Do NOT go to the ED
- If approaching shift change, do NOT leave unless given clearance to do so by Supervisor
- Continue with normal duties unless specifically directed otherwise by your Manager/Supervisor/Director
- Wear your ID badge
- Check your KHSC email for updates
- Limit telephone usage (personal and land-lines) to essential calls only
- When Code Orange is stood down, continue normal duties, assess resource deficits, and report to Manager/Supervisor

2. Check the Table of Contents to see if there is a specific action card (detailed list of specific tasks required) for your role within the organization.

3. If your role is not listed, then refer to **Page 18** for expected actions by Department, Service, or Staff group within KHSC.

4. Reference the Code Orange Organizational structures on **Pages 12, 15 & 16**

5. Recall the Functional Areas that will be established during the response (**Page 79**)

1.15. Specific Job Action Cards for Code Orange Response Roles – Refer to Table of Contents

Refer to the Table of Contents to determine if there is a specific Code Orange Job Action for response and the associated page number. Specific Job Action cards are also pre-printed and available in the Emergency Department, Critical Care and KHSC EOC Incident Command Supplies

Job Action Cards are on pages 23-107

1.16. Expected Actions by Department, Service or Staff Group within KHSC

Department, Service, Staff Group	Expected Actions
All VPs, Chief of Staff, CEO	<ul style="list-style-type: none"> • Report to the Dietary 3 Boardroom to activate the Emergency Operations Centre (EOC) Incident Command team • Refer to Code Orange EOC Roles • Appreciate existing resources and challenges in services/programs and prepare to support the response
Charge Nurses, Program Managers and Directors	<ul style="list-style-type: none"> • Optimize existing bed capacity <ul style="list-style-type: none"> ○ Assess existing bed and staffing resources ○ Triage existing patients, identifying potential discharges ○ Notify Admitting of potential discharges or transfers ○ Provide up to date bed census information to Registration and Health Information Services ○ Work with Social Work and Transport Services to notify families of patients being discharged and move patients to Discharge Staging Area (Armstrong Level 1) and/or transferred via Private Transfer companies • Cancel or postpone all non-emergent tests and procedures • Prepare for new admissions and call in additional staff <ul style="list-style-type: none"> ○ Anticipate receiving admitted or consulted patients from the ED and up staffing appropriately ○ Inpatient services are expected to send staff to collect and transfer patients from the ED to inpatient beds ○ Staff reporting to hospital should be reminded to bring their ID badge and report to the Staff Entrance (Watkins 2 Old Entrance), where they will be directed to an appropriate staff pooling area
Cancer Center	<ul style="list-style-type: none"> • Complete procedures in process and postpone/cancel upcoming procedures on a case by case basis, if directed by the EOC
Diagnostic Imaging	<ul style="list-style-type: none"> • Complete procedures in progress and cancel elective cases/studies • Ensure adequate Technician and Radiologist coverage for large volume of imaging studies
Environmental Services	<ul style="list-style-type: none"> • Environmental Service Assistants (ESAs) to be reassigned from non-patient areas to ED, OR, Discharge holding areas by Environment and Transport Lead • ESAs to: <ul style="list-style-type: none"> ○ Prepare stretchers in Burr Gym ○ Setup two additional cleaning carts for ED • Linen team to: <ul style="list-style-type: none"> ○ Provide Linen cart to Burr Gym with basic supplies ○ Stock linens in ED ○ Assess linens on hand throughout hospital and determine any emergency needs • Upon Stand down:

	<ul style="list-style-type: none"> ○ Clean Burr Gym ○ Clean Triage Areas ○ Return to regular duties
Laboratory/Blood Bank	<ul style="list-style-type: none"> ● Assess existing staff resources and initiate fan out to support anticipated resource needs ● Assess blood product inventory and determine, based on available information on casualties, whether more products are likely to be required, taking action to ensure adequate supplies
Material Management Personnel	<ul style="list-style-type: none"> ● Optimize delivery of supplies and equipment to the ED, OR, Critical Care and other patient care areas ● Ensure Supply Chain Manager aware (contact if after hours)
Operating Room Personnel	<ul style="list-style-type: none"> ● Complete all procedures in progress ● Postpone or cancel all non-emergent upcoming procedures ● Assess need for additional staff, Surgeons, Anesthesia, Perfusionists and initiate fan out ● Contact Central Processing if additional surgical equipment (e.g. for trauma surgery) is likely to be required
Pharmacy	<ul style="list-style-type: none"> ● Ensure sufficient staff / medications to meet increased medication demands as required for response
RACE Team	<ul style="list-style-type: none"> ● Primary responsibility remains in responding to RACE team activations within the hospital. ● If available, RACE Physician and Nurse should report to ICU Senior Physician, for direction.
Registration and Health Information Services	<ul style="list-style-type: none"> ● Work with all inpatient units, Admitting, and the Operations Manager (ACO) to maintain an up to date bed census ● Assess the need to call in additional staff ● Liaise with Physician and Nurse in Charge to access Translation Services if required ● In the ED, register incoming casualties, track patient movement from the ED, ensuring individual charts accompany patients ● If the Burr 1 Conference room is used, send one registration staff member with tote containing downtime forms to complete registrations for patients directed to this area
Respiratory Therapy	<ul style="list-style-type: none"> ● Manager (or Shift Supervisor) should assume “Lead” RT role for ED ● Another RT should be assigned the role of “ICU Charge RT” (see Action Card #22 for this role) ● Both RTs should work together to: <ul style="list-style-type: none"> ○ Establish and maintain an active inventory of available ventilators within KHSC ○ Assign RTs to ED, Critical Care, ORs, and other inpatient areas ○ Initiate fan-out for additional RTs as necessary ○ Report to ED and ICU Charge RNs, respectively
Security	<ul style="list-style-type: none"> ● Limit access to the ED ● Set up supplies required for the EOC and ED Incident Command centres

	(EOC-Dietary 3 Boardroom, ED – ED Directors office) <ul style="list-style-type: none"> • Assist with CBRN equipment deployment and set-up if required
Spiritual Health	<ul style="list-style-type: none"> • Work with Social Work to assist patients and family members in need of warm, empathetic presence, psychological first aid, etc. • Assist in connecting patients and families
Strategy, Management, and Communications	<ul style="list-style-type: none"> • Provide communication as needed to staff, visitors, the general public after approval by Incident Commander • Provide updated message on the Emergency Update line for inquiring family members • Discuss with the Incident Commander assigning a live person to answer the Emergency Update line for inquiring family members • Assist in setting up a media area in Nickle 2 Conference Room • Monitor media outlets (social, printed or broadcast) to develop follow-up news releases and rumour control as appropriate
Transportation Services	<ul style="list-style-type: none"> • Porters to bring all available Transportation Chairs from lobby areas to triage areas (i.e. ambulance entrance) • 2-4 Porters to be dedicated to ED with four stretchers for transport between X-ray and CT Scan and Burr Gym • Porters to bring 8 Stretchers to Burr Gym • Additional Stretchers prepared and made available outside of ED • Upon “Stand down” <ul style="list-style-type: none"> ○ Clean and Redistribute all Transportation Chairs to entrances and other designated areas ○ Clean and redistribute stretchers from ED and Burr Gym ○ Return to regular duties
Volunteer Services	<ul style="list-style-type: none"> • All volunteers should report to the Volunteer Pooling Area (see Page 27 – Connell 1 Room 2-192) • Appoint a Lead for Volunteer services (the Director if available) • The Lead will report to the Support Staff Operations and Planning Officer • This Lead should assign an appropriate number of volunteers to the following areas: ED waiting room (to direct and support family members), the Family Waiting Area (Etherington Auditorium), and Discharge Staging Areas (Armstrong Level 1), • Volunteers will take direction from a Lead Social Worker or Spiritual Health Practitioner in the Family Waiting Area

Code Orange Role	ED Physician in Charge	
Normal Position	ED “Section A” Attending Physician	
Work Location	Emergency Department	
Responsible to	Medical Operations Officer in Incident Command Center	
Role description		
You will work with the ED Charge Nurse in jointly leading the clinical activities of the emergency department. All physicians working in the department, including the Trauma Team Leader, OR Lead, and the HDH UCC Attending Physician report to you.		
Code Orange Standby		
<input type="checkbox"/> Complete the code orange notification document		
<input type="checkbox"/> Initiate the Code Orange Standby notification by notifying Switchboard (daytime hours) or in working with the ED Charge RN and Operations Manager (ACO) to contact the necessary parties (afterhours) – see Page 8 and Page 9		
<input type="checkbox"/> Liaise with the CACC MCI desk, , and the ED Charge RN to make a decision within 30 minutes as to the need to activate the full Code Orange Response		
<input type="checkbox"/> Communicate the decision to stand down or escalate with the Standby Notification Group		
<input type="checkbox"/> Locate the Code Orange supplies in the Filing Cabinet in the Ambulance Bay office		
Code Orange Activation		
<input type="checkbox"/> Don the “Bronze” ED Physician in Charge vest and align with ED Charge RN – you will work together to direct the clinical activities of the department		
<input type="checkbox"/> Work with the Operations Manager (ACO), Charge RN, and inpatient Attending Physicians to rapidly decant admitted and consulted patients from the department to inpatient units and the ATU		
<input type="checkbox"/> Liaise with ED Charge Nurse and Security to determine if Decontamination area needs to be set up		
<input type="checkbox"/> Establish and staff the following areas as below (minimal requirements):		
Location	Purpose	Minimal staffing
Ambulance arrival/offload	Triage	RN x1, MD x1, Unit clerk x1
Section A/D	Critical patients (Triage: “Red”)	RN x5, MD x3, Unit clerk x1
Section A Consultant Working area	Consulting Physician and Resident staging area – for Trauma Team (and other) physicians awaiting patient assignments	Excess physicians beyond this space should be directed out of ED to await direction
Section B/C	Immediate patients (Triage: “Yellow”)	RN x3, MD x2, Unit clerk x1
ATU	ED patient decanting/overflow	RN x2, MD x1, Unit clerk x1
Burr gym (Set up - Appendix B, Page 111)	Minor patients (Triage: “Green”)	RN x3, MD x2, Unit clerk x1
<input type="checkbox"/> Assign a Triage Nurse and Physician and ensure they have their Vests and Action Cards. Assign a registration clerk to work alongside them as a “Triage Team.” Remove all patients and stretchers from the offload area to create space to receive patients		
<input type="checkbox"/> Expect that all Critical patients (Triage: “Red”) are brought to your attention		
<input type="checkbox"/> Communicate with HDH UCC Attending Physician and discuss any plans to divert patients		
<input type="checkbox"/> Escalate any resource requirements (personnel, equipment, communications, etc.) to the Medical Operations Officer		
<input type="checkbox"/> Work with the ED Charge RN, TTL, and OR Lead to efficiently disposition patients to the OR, ICU, Radiology, etc.		
<input type="checkbox"/> Ensure all front line staff received relevant clinical updates regarding the incident (e.g. name of chemical/antidote if CBRN event)		
Code Orange Stand-down		
<input type="checkbox"/> Maintain situational awareness for when the Code Orange can be stood down and communicate this to the ED Physician in Charge and Nursing Operations Officer		

<input type="checkbox"/> You will be informed of the decision to stand down by the Incident Command Center <input type="checkbox"/> Ensure all nursing staff return to normal clinical activities <input type="checkbox"/> With the ED Physician in Charge and Incident Commander organize a “hot debrief” following the stand down		
Essential numbers

Code Orange Role	Emergency Registration Clerk
Normal Position	Emergency Registration Clerk
Work Location	ED Section A nursing station and ED Triage Desk
Responsible to	ED Charge Nurse and Logistics Officer
Role description You will aim to optimize registration efficiency during the code orange response. This will require some flexibility in terms of work location and responsibilities compared to day to day activities, particularly if you are the only registration clerk available. When additional registration clerks arrive you should provide direction to them based on the responsibilities listed below.	
Code Orange Activation <input type="checkbox"/> Speak to the ED Charge Nurse and confirm how many registration clerks are currently available in the ED and whether additional registration clerks can immediately be drawn from Medical Records or Admitting. <input type="checkbox"/> If additional Registration Clerks are needed this should be brought to the ED Incident Commander, who will make the request to the EOC <input type="checkbox"/> In the event that exceptional circumstances lead to a high volume of unidentified patients arriving at the same time it may be deemed necessary to register them as Unknowns and potentially merge charts once identified. If this is the case the following nomenclature should be used: Last Name = Unknown First Name = A Male, B Male, C Male and so on and so on <input type="checkbox"/> If there is only one registration clerks available: <input type="checkbox"/> Form a “Triage team” consisting of you, one Physician, and one Nurse located in the ambulance offload area to receive all arriving patients. Note that all computers in the offload area will print to the Section A nursing station (the two adjacent to the Section A unit clerk as well as the computer beside offload Bed 1). The process will be: <input type="checkbox"/> Patient is be briefly assessed and triaged by the Physician and Nurse <input type="checkbox"/> Registration Clerk (or if deemed necessary Triage Trained Nurse) completes “Mini-reg” of all patients in PCS to create armband <input type="checkbox"/> Nurse completes triage in EDIS <input type="checkbox"/> If patient is triaged as higher acuity (to remain in Sections A-D), Registration Clerk completes registration, prints wristband and stickers, but wouldn’t verify information unless family member present – If possible verification happens later by registration clerk <input type="checkbox"/> If patient is triaged as lower acuity and sent to waiting room or Burr Gym then registration will be completed later <input type="checkbox"/> Ambulatory patients walking into ED would be triaged and “mini-reged” by the triage nurse as per normal and then wait in waiting room to subsequently be called by CTAS score to complete registration once clerk has finished with “Triage team” or once second clerk arrives (as per standard practice) <input type="checkbox"/> If there are two registration clerks: <input type="checkbox"/> One registration clerk will join the “Triage Team” and perform the duties above <input type="checkbox"/> A second registration clerk will be positioned at the Registration desk in the waiting room arrival area (usual position) <input type="checkbox"/> This clerk will complete registration on all ambulatory patients presenting to the Triage Nurse in the waiting room (per usual processes) and also complete registration on patients who were “Mini-reged” in EDIS by the Triage Team but sent to the waiting room <input type="checkbox"/> Patients who were previously “Mini-reged” should be called to the desk according to Triage acuity (CTAS score) and secondarily by time of arrival (analogous to HDH UCC standing practice) to have registration completed <input type="checkbox"/> If there are three registration clerks available and/or the Burr Gym is opened: <input type="checkbox"/> If Burr gym is opened, one clerk will go there to perform registration duties, utilizing the Code Orange laptop computer in admitting and the Code Orange cart that will be supplied by IT <input type="checkbox"/> A third unit clerk can be used to complete a second “Triage team” in the Ambulance offload area if one is established by the ED Physician/Nurse in Charge	
Code Orange Stand-down	

<input type="checkbox"/> Continuously seek information from the ED Incident Command Team and Physician/Nurse in charge that would allow the Code Orange to be stood down <input type="checkbox"/> The decision to stand down the Code Orange is made by KHSC EOC Incident Commander with the agreement of the ED Incident Command Team <input type="checkbox"/> Prepare notes and casualty data for debrief

Code Orange Role	Trauma Team Leader (TTL)	
Normal Position	On-Call Trauma Team Leader/Medical Director Trauma Program	
Work Location	Emergency Department	
Responsible to	ED Physician in Charge	
Role description Your role is very similar to the usual TTL role in that you will provide oversight of the clinical management of all “Trauma Team” activated/consulted patients. In the context of a MCI you will need to create a number of trauma teams to coordinate care for all of the patients and supervise the activity of each team. It is important to contact the Medical Director of the Trauma Program early on to assist with clinical management, coordinating a “fan-out” for additional TTLs, and assisting with administrative activities associated with the response.		
Code Orange Activation <ul style="list-style-type: none"><input type="checkbox"/> Locate ED Physician in Charge and review Code Orange Notification document<input type="checkbox"/> Don the “TTL” vest and locate a portable phone in the ED. Provide the extension number to the OR Lead and ED Physician in Charge.<input type="checkbox"/> Consult with ED Physician in Charge to decide if additional TTLs need to be called in<input type="checkbox"/> Ensure Medical Director for Trauma is aware of Code Orange. Ask them to call in additional TTLs if necessary.<input type="checkbox"/> Contact Radiologist On-Call to ensure both CT scanners are staffed and operational and that Attending Radiology support in rapidly reading CTs is established.<input type="checkbox"/> If necessary contact “Ornge” Air Ambulance and request to speak with On-Call Flight Physician to confirm details of incident, expected number and acuity of casualties, how many are coming to KHSC (or Ottawa/Toronto), etc.<input type="checkbox"/> Work with OR Anesthesiology Manager (OR Lead), Trauma Medical Director, and other “Attendings” to:<ul style="list-style-type: none"><input type="checkbox"/> Create small “Trauma Teams” appropriate to patient acuity (e.g. one Physician/Resident and one Nurse)<input type="checkbox"/> Arriving physicians should stage in the Consultant work area in Section A. Direct physicians to wait there and draw from this pool.<input type="checkbox"/> Excess physicians should be advised they can leave the ED and that they will be contacted if needed.<input type="checkbox"/> Maintain oversight of Trauma team assessments and triage patients to OR, CT, observation, or discharge home (and in what order they should go)<input type="checkbox"/> Ensure Surgical Residents have contacted their “Attendings” and asked them to come to the ED (if necessary)<input type="checkbox"/> Recall that Diagnostic Imaging will be overwhelmed in a MCI. The initial priority in an MCI is simply to identify life and limb threatening injuries. Stable patients requiring Trauma “Pan CT Scans” can have this imaging delayed entirely. A greater emphasis on clinical examination, X-ray imaging, Point of Care Ultrasound, and selective CT scan use will be necessary.<input type="checkbox"/> Liaise with Trauma Medical Director to establish whether CritiCall Ontario has been notified of Code Orange, whether KHSC needs to be taken “offline” for community trauma referrals, and if Toronto or Ottawa Trauma Centers should be contacted for assistance, patient diversion, general communication<input type="checkbox"/> Ensure the ED Physician in Charge is updated of any clinical or human resource needs. Requests for significant resources should flow through the ED Incident Commander to the KHSC EOC.		
Code Orange Stand-down <ul style="list-style-type: none"><input type="checkbox"/> The decision to stand down the Code Orange is made by KHSC EOC Incident Commander with the agreement of the ED Incident Command Team<input type="checkbox"/> Prepare any notes and documentation for debrief<input type="checkbox"/> Attend debrief session

Code Orange Role	ED Triage Nurse, ED Triage Physician
Normal Position	ED Attending Physician, ED Nurse
Work Location	ED Incident Command Center
Responsible to	ED Physician in Charge
Role description This card describes both the ED Triage nurse and ED Triage Physician roles. As a team you will triage all MCI patients.	
Code Orange Activation <ul style="list-style-type: none"> <input type="checkbox"/> You will be assigned this role by the Charge Nurse or Physician in Charge. Find at least one Registration clerk to work with you as a “Triage Team” to triage and register patients simultaneously. <input type="checkbox"/> Don the “Triage Nurse” and Triage Physician vests, respectively <input type="checkbox"/> Work with Security to ensure a Decontamination (if necessary) as well as a Triage area have been established outside the ED in the ambulance arrival area <input type="checkbox"/> Establish whether the Burr 1 Gym is needed for “Walking Wounded” (Triage: “Green”) casualties and ensure this is set up. Note that Information Technology needs to be notified to bring a laptop computer and set this up for registration. Determine if additional Triage Nurses and Physicians are immediately required (based on expected number of casualties and waiting room/departmental patient volumes) and if necessary assign those roles <input type="checkbox"/> Assign one Nurse to remain at the usual ED Triage desk in the role of “Secondary Triage Nurse”. This nurse is responsible for monitoring patients in the waiting room and bringing them into the department as bed space permits. <input type="checkbox"/> Advise waiting room patients the hospital is experiencing a mass casualty event and ask all patients to go home/HDH UCC/walk in clinic if they feel they are well enough to do so <input type="checkbox"/> Notify HDH UCC Physician/Charge Nurse if patients are being diverted there <input type="checkbox"/> Locate a Registration clerk to join the two of you as a “Triage Team”. The process should be: <ul style="list-style-type: none"> <input type="checkbox"/> Patient is be briefly assessed and triaged by the Physician and Nurse <input type="checkbox"/> Nurse or Registration Clerk completes “Mini-reg” of all patients in EDIS <input type="checkbox"/> If patient is triaged as higher acuity (remaining in Sections A-D), Clerk completes registration, prints wristband/stickers, patient is moved to bed <input type="checkbox"/> If patient is triaged as lower acuity and sent to waiting room or Burr Gym then registration process (printing of stickers/wrist bands) will be completed later, either from the waiting room or the Burr Gym <input type="checkbox"/> Use the Triage system outlined below or consider that in general, CTAS 1/2 patients should be “Red”, CTAS 3 are “Yellow”, CTAS 4/5 are “Green” 	
<pre> graph TD A[All Walking Wounded] --> B[MINOR] B --> C[RESPIRATIONS] C -- NO --> D[Position Airway] D -- NO respirations --> E[DECEASED] D -- Respirations --> F[IMMEDIATE] C -- YES --> G[Under 30/min.] C -- YES --> H[Over 30/min.] H --> I[IMMEDIATE] G --> J[PERFUSION] J -- Radial Pulse Absent OR Capillary Refill Over 2 seconds --> K[Control Bleeding] K --> L[IMMEDIATE] J -- Radial Pulse Present --> M[MENTAL STATUS] M -- CAN'T Follow Simple Commands --> N[IMMEDIATE] M -- CAN Follow Simple Commands --> O[DELAYED] </pre>	
<ul style="list-style-type: none"> <input type="checkbox"/> Using a bold marker, write a large sized letter on the patient’s right hand indicating the level of care (R – Red, Y- Yellow, G- Green, B- Black) and have staff direct patients to the following areas based on triage: Red – Sections A/D, Yellow – Section B, Green – Burr 1 Gym, Black – Douglas 1 morgue (via Transportation 	

services) <input type="checkbox"/> All Critical (“Red”) patients should be brought to the attention of the ED Charge Nurse and/or Physician in Charge <input type="checkbox"/> If there are two or three Charge Nurses and Registration clerks available you can do one or more of: 1) form a second “Triage team” in the offload area, 2) assign a Registration clerk to work in the usual triage/registration area of the ED (to support a Second ED Triage Nurse there) by completing registrations on “Mini-Reged” patients, or 3) if Burr gym is opened – assign them to work there <input type="checkbox"/> Ensure one Nurse remains at the usual ED Triage desk in the role of “Secondary Triage Nurse”. This nurse is responsible for monitoring patients in the waiting room and bringing them into the department as bed space permits. <input type="checkbox"/> Attempt to see patients in the waiting room – those from the incident and those in the ED for other reasons – support the secondary triage nurse, reassess/re-triage as necessary, and discharge appropriate patients <input type="checkbox"/> Ensure the ED Physician and/or Nurse in Charge is updated of any clinical or human resource needs		
Code Orange Stand-down <input type="checkbox"/> The decision to stand down the Code Orange is made by KHSC EOC Incident Commander with the agreement of the ED Incident command Team <input type="checkbox"/> Prepare any notes and documentation for debrief and attend the debrief

KHSC Emergency Operations Centre (EOC) Section

- This page left blank intentionally -

Code Orange Role	EOC Incident Commander
KHSC President & CEO/COO – Code Orange Role – EOC Incident Commander	
Normal Position	KHSC President & CEO/COO
Work Location	Dietary 3 Boardroom
Responsible to	KHSC Board of Directors
Role description <p>You will direct the KHSC organizational operational response to the Code Orange. This involves setting the overall strategy, actioning requests for resources from the ED, Perioperative and Critical Care Services , and planning for the resumption of normal “business activities” as the Code Orange winds down. The most critical early actions will be creating bed capacity, upscaling human and physical resources, and establishing external communication.</p>	
Code Orange Activation <ul style="list-style-type: none"> <input type="checkbox"/> Read this entire Job Action Sheet before proceeding <input type="checkbox"/> Don the “Gold” EOC Incident Commander Vest <input type="checkbox"/> Request that: <ul style="list-style-type: none"> <input type="checkbox"/> All EOC members have been contacted and are either present or en-route to the EOC <input type="checkbox"/> Someone is assigned as Recording Scribe <input type="checkbox"/> An Emergency Procedures Manual is present <input type="checkbox"/> Review available information on the incident using Code Orange Notification document as a guide: expected number and acuity of casualties, timelines, ED, OR, Critical Care, other inpatient capacities, HDH site capacities, etc. <input type="checkbox"/> Delegate the following Incident Command Positions: (Note that some positions may not be required in a particular incident and some roles can be dismissed/deferred as appropriate. Conversely, at the outset of the incident, one individual may need to take on more than one role, until additional staff arrive.) <ul style="list-style-type: none"> <input type="checkbox"/> Medical Operations Officer (Chief of Staff/VP Medical Affairs) <input type="checkbox"/> Nursing Operations Officer (Chief of Quality & Clinical Transformations) <input type="checkbox"/> EVP Patient Care & Community Partnerships and Chief Nursing Executive <input type="checkbox"/> VP Patient Care <input type="checkbox"/> Risk Management Officer <input type="checkbox"/> Logistics Officer (Chief Operating Officer) <input type="checkbox"/> Finance Officer (Chief Financial Officer) <input type="checkbox"/> Liaison & Support Services Planning Officer (VP Mission & Strategy Integration & Support Services) <input type="checkbox"/> Liaison Officer (Director Protective Services) <input type="checkbox"/> Communications Officer (Director Communication & Strategy Management) <input type="checkbox"/> Planning Officer (Joint VP & Chief Human Resources Officer) <input type="checkbox"/> Executive Assistant (Administrative Assistant) <input type="checkbox"/> Recording Secretary (Administrative Assistant) <input type="checkbox"/> With the input of the other EOC members, set the initial priorities and action plans for the response <input type="checkbox"/> If it is determined that a live person/team is required to answer the emergency update line; assign a person/team to provide updates and answer questions. The call may be initially answered by a live person and triaged to the KHSC EOC to delegate an appropriate person for clinical information/response if required. <input type="checkbox"/> If necessary, task Security Operations Center (x4142) to initiate staff fan out <input type="checkbox"/> If necessary, establish Staff pooling areas – see “Functional Areas” (Page 79) <input type="checkbox"/> Confirm if the ED staff have opened the Burr Gym for “walking wounded” patients. If opened, the ED leadership will provide oversight to this area as an extension of the Emergency Department, but will make requests to the EOC for additional human or materials resources. <input type="checkbox"/> Consider whether information, discussion, and/or external support from any of the following partners could aid in the response and task Liaison Officer to contact, if necessary: <ul style="list-style-type: none"> <input type="checkbox"/> The City of Kingston <input type="checkbox"/> Kingston Frontenac Lennox and Addington Public Health <input type="checkbox"/> Providence Care or other regional hospitals <input type="checkbox"/> South-East LHIN 	

- ☐ Ministry of Health Emergency Management Branch
- ☐ Other regional hospitals
- ☐ Respond to resource requests from ED, OR, Critical care & other inpatient units
- ☐ Establish rapid cycle meetings approximately every 15-30 minutes to review status of action plan items

Code Orange Stand-down

- ☐ Continuously seek information from the ED Incident Command Team and Bronze level leaders that would allow the Code Orange to be stood down
- ☐ The decision to stand down the Code Orange is made by you, with consensus from the EOC, and based on inputs from the ED and inpatient units
- ☐ Ask switchboard to announce “Code Orange All Clear” three times and ensure the stand down decision is communicated throughout the organization
- ☐ Organize a “hot debrief” for the EOC and ED/Critical Care Incident Command Teams
