CPCSSN creates

A pan-Canadian standardized,
high quality, de-identified primary
care database

CPCSSN-Established 2008

- **10+ years** of R & D
- A resource for quality improvement, disease/condition surveillance, research, health system planning
- 2M patients, 1260 clinicians, federates data from 17 EMRs

- 11 PBRNs in 7 provinces, 1 territory
- Strong partnerships with:
 - College of Family Physicians
 - Public Health Agency of Canada
 - Diabetes Action Canada
 - Canadian Institute for Military & Veteran Health Research
 - Canadian Frailty Network

B.C. (BCPCReN), **Alberta** (SAPCReN, NAPCReN), **NWT**, **Manitoba** (MaPCReN), **Ontario** (DELPHI, UTOPIAN, EON, MUSIC), **Quebec** (RRSPUM), **Nova Scotia/New Brunswick** (MaRNet), **Newfoundland** (APBRN)

CPCSSN data quality

- Clean and recode:
 - Billing, Encounter, and Problem List Diagnoses (ICD-9)
 - Medications & Vaccines (ATC)
 - Allergies and Intolerances
 - Lab results (LOINC)
 - Referrals (SNOMED CT)
 - Physical signs (weight, height, BP, unit conversion, calculate BMI)
 - Risk factors (smoking, alcohol, diet)

EMR Vendors (and products):

Telus (Kinlogix, Med Access, Medesync, Nightingale, Practice Solutions, Telin, Wolf)

QHR (Accuro, Jonoke, Healthscreen, xwave)

CPCSSN after 10+ years of R&D

- 11 case definitions
- Machine learning algorithms
- Data used in >100 projects
- >133 peer-reviewed publications

A high-angle, black and white photograph of a massive, curved, metallic structure, likely a bridge or a large-scale architectural element. The structure is composed of many vertical panels and has a person standing on top for scale. The lighting is dramatic, with strong highlights and deep shadows.

HOW COULD AI IMPROVE PRIMARY CARE

CLINICAL & ADMINISTRATION

ADMINISTRATIVE AREAS

ANNALS OF MEDICINE NOVEMBER 12, 2018 ISSUE

WHY DOCTORS HATE THEIR COMPUTERS

Digitization promises to make medical care easier and more efficient. But are screens coming between doctors and patients?

By Atul Gawande November 5, 2018

Digitization promises to make medical care easier and more efficient; instead, doctors feel trapped behind their screens.

ADMINISTRATIVE TASKS

- ▶ Charting with NLP
- ▶ Patient interaction- eg determining and arranging appointments- includes assessing/triaging patients
- ▶ Populating chart areas– patient conversation, incoming documents
- ▶ Managing wait times (predicting visit load etc)
- ▶ Billing
- ▶ Filling out forms

Birth weight:

S: Doing well, interactive, no parental concerns. Feeding adequately every couple of hours. Has started iron fortified foods as well as fruits and vegetables. Voiding well, at least 7 wet diapers per day.

O/E: see Rourke for details.
 General: Alert and awake
 HEENT: normal anterior fontanelle- soft non-sunken,
 RR present x 2, corneal reflex normal
 Cardio: S1/S1 no MM
 Resp: GAEB, no adventitia
 Abdo: soft, no HSM
 MSK: normal Barlow and Ortolani
 Neuro: good tone
 Femorals: normal x 2

DTaP-IPV and Hib administered.

Assessment: healthy, normal 6 mo WBC, no concerns. Following growth curve. No developmental concerns.

Plan: F/u at 9 mos for WBC

This worker contacted the patient to follow-up on the social work referral. The following explanations were provided:
 -role of triage
 -nature of social work supports at QFHT
 -duty to report

The follow inquiries were made:
 Do you have access to EAP (Employee Assistance Program), or psychotherapy benefits through your workplace?

CLINICAL AREAS (COGNITIVE OVERLOAD)

- ▶ Intelligence from longitudinal data (labs, measurements, etc)
- ▶ Aiding/generating diagnosis
- ▶ Decision support
- ▶ Predicting disease- eg. Diabetes
- ▶ Recommend screening (Fhx, medication, surgical hx, etc)
- ▶ Recommend services for specific populations (socially/ materially deprived, mental health, disease specific)

CLINICAL AREAS- LONGITUDINAL DATA

CLINICAL AREAS- AIDING DIAGNOSIS

CLINICAL AREAS- DIAGNOSIS

Table 5.1.
Essential Dermatologic Diseases

1. Vesiculobullous diseases
 - A. Vesicular diseases
 - i. Herpes simplex
 - ii. Varicella-zoster
 - iii. Vesicular tinea pedis
 - iv. Dyshidrosis (pompholyx)
 - v. Dermatitis herpetiformis
 - vi. Scabies
 - B. Bullous disease
 - i. Pemphigus vulgaris
 - ii. Pemphigoid
 - iii. Erythema multiforme bullosum (Stevens-Johns)
 - iv. Poison ivy contact dermatitis
 - v. Bullous impetigo
 - vi. Traumatic bullae (friction, burns and pressure)
2. Pustular diseases
 - A. True (soft) pustules
 - i. Acne vulgaris and related variants
 - ii. Rosacea (acne rosacea)
 - iii. Bacterial folliculitis
 - iv. Fungal folliculitis
 - v. Candidiasis
 - B. Pseudopustules (see group 4, white papules)
 - i. (Milia)
 - ii. (Keratosis pilaris)
 - iii. (Molluscum contagiosum)
3. Skin-colored papules and nodules
 - A. Rough surfaced (keratotic) lesions
 - i. Warts: verruca vulgaris, paronychia warts and
 - ii. Actinic keratoses
 - iii. Squamous cell carcinoma (actinically induced)
 - iv. Corns and calluses
 - B. Smooth-surfaced (nonkeratotic) lesions
 - i. Warts: flat warts, genital warts
 - ii. Basal cell carcinoma
 - iii. Squamous cell carcinoma (mucosal and non-a
duced)
 - iv. Epidermoid ("sebaceous") cysts
 - v. Lipomas
 - vi. Molluscum contagiosum
4. White lesions
 - A. White patches and plaques
 - i. Pityriasis (tinea) versicolor
 - ii. Pityriasis alba
 - iii. Vitiligo

Table 5.1. Continued

- B. White papules
 - i. Milia
 - ii. Keratosis pilaris
 - iii. Molluscum contagiosum
5. Brown, blue, and black lesions
 - A. Brown, blue, and black macules, papules, and nodules
 - i. Freckles
 - ii. Lentigines
 - iii. Nevi: junctional, compound and intradermal
 - iv. Nevi: dysplastic
 - v. Melanoma
 - vi. Seborrheic keratoses
 - vii. Dermatofibromas
 - B. Brown, blue, and black patches, plaques, and generalized
hyperpigmentation
 - i. Café-au-lait patches
 - ii. Giant congenital nevi
 - iii. Pigmentation secondary to drugs and systemic disease
6. Yellow lesions
 - A. Yellow papules and plaques
 - i. Xanthelasma
 - ii. Sebaceous gland hyperplasia
 - B. Yellow patches and generalized yellow color
 - i. Necrobiosis lipoidica diabetorum
 - ii. Jaundice
7. Red macules, papules, and nodules
 - A. Red macules and papules
 - i. Insect bites
 - ii. Cherry angiomas
 - iii. Spider angiomas
 - iv. Pyogenic granulomas
 - v. Granuloma annulare
 - vi. Viral exanthems (nonvesicular)
 - B. Red nodules
 - i. Furuncles
 - ii. Inflamed cysts
 - iii. Hidradenitis suppurativa
 - iv. Cellulitis
 - v. (Erythema nodosum)
8. Vascular reactions
 - A. Nonpurpuric (blanchable) lesions
 - i. Transient flat erythema (flushing reactions)
 - ii. Persistent flat erythema
 - iii. Urticaria and angioedema
 - iv. Annular and gyrate erythemas
 - v. Erythema multiforme
 - vi. Erythema nodosum

nued

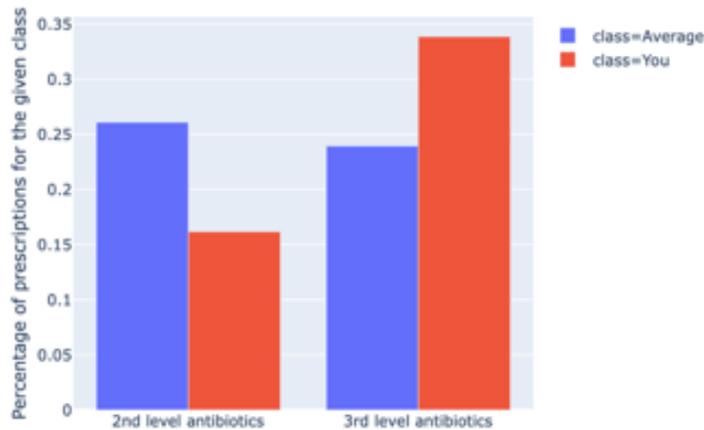

nonblanchable) lesions
 iae (only)
 iae and ecchymoses (intravascular and extravascular
 ura)
 ial papules (vasculitis)
 iae with ulceration (vascular ulcers)
 us diseases
 nd/or papules predominate
 is rosea
 planus
 dary syphilis
 e psoriasis)
 nd/or plaques predominate
 sis
 orporis, cruris, pedis, manus, and capitis
 erythematous (discoid type)
 ioniasis and mycosis fungoides
 dermatitic) diseases
 l excoriation and/or lichenification
 dermatitis (neurodermatitis, lichen simplex chronicus,
 ntile eczema)
 rotic eczema
 dermatitis
 s (scabetic eczema)
 tive erythrodermatitis
 xcoriation
 heic dermatitis
 : eczema
 contact dermatitis
 : contact dermatitis
 atous reaction patterns (nummular eczema and auto-
 smatization)

CLINICAL AREAS- DECISION SUPPORT

Your diagnosis

Acute Cystitis Females >12 years old,Uncomplicated Pneumonia- Adult: Community acquired, mild to moderate, Outpatient without comorbidity/modifying factors

Your prescription behavior for 2nd and 3rd line antibiotics

Prescriptions for female patients between 20-30 years for the same diagnosis

Your treatment options

Recommended antibiotics for your area

1st level - TMP/SMX 1 DS tab po bid for 3 days

GENERATE PRESCRIPTION

SEND PRESCRIPTION

CONCLUSIONS

- ▶ Major opportunities for AI in primary care
- ▶ AI components can help to deliver more efficient and better care
- ▶ Could be a major player in addressing clinician burnout
- ▶ Challenges include getting EMR vendors to develop and implement AI solutions
- ▶ Data from CPCSSN can help to develop AI solutions

TEXT

**WE ALWAYS OVERESTIMATE THE CHANGE
THAT WILL OCCUR IN THE NEXT TWO YEARS
AND UNDERESTIMATE THE CHANGE THAT
WILL OCCUR IN THE NEXT TEN.**

Bill Gates
