

COVID-19 Screening for KHSC Staff

Please carefully read the screening questions. **SCAN STOP** if you answer **YES** to any question or **SCAN PROCEED** if all your responses are **NO**.

1. I have a **FEVER** (temperature of $\geq 37.8^{\circ}\text{C}$), **OR** any of the following **SYMPTOMS** (not related to other known conditions or COVID-19 vaccination in the past 48 hours) **AND** I have NOT been cleared by OHS to be in the workplace
 - runny or stuffy/congested nose, sore throat, chills, cough, shortness of breath or difficulty breathing, decrease or loss of sense of taste or smell, muscle aches/joint pain, extreme fatigue/tiredness, gastrointestinal symptoms (nausea/vomiting/diarrhea)

Answer "NO" if your acute symptoms have resolved AND your COVID-19 PCR test is Negative;

Note- for staff who have had COVID-19 in the past 60 days, a negative rapid antigen test is required instead of a PCR test

2. In the last 10 days I have:
 - **had household or high risk* contact with a confirmed case of COVID-19** and have not been cleared to return to work by my Manager or OHSW.

Answer "NO" and see question #5 below if you have had tested positive for COVID-19 in the past 60 days and completed your isolation period

3. In the last 10 days **I have had a positive lab confirmed (PCR) COVID-19 test, OR positive rapid antigen test AND** I've not been cleared to return to work by OHS.
4. In the last 14 days I have returned from travel outside of Canada **AND have been informed a federal quarantine period is required.**

DO NOT ENTER if you answered YES to any question above

5. If any of the following apply to you, please **SCAN STOP**; you may enter but are required to be on **Work Isolation** and **must obtain the work isolation** document to determine what other protocols and testing are required:
 - I have a household or high risk contact who has tested positive for COVID-19 but I am symptom free, isolating from my contact, my initial COVID-19 PCR test is negative, **AND I have been cleared to return to work but instructed by my Manager or OHSW to work isolate, OR**
 - I have a household contact who is experiencing new COVID-19 **like** symptoms who has not yet had a COVID-19 PCR test (you need to rapid test yourself daily until your household contact has their PCR test result), OR
 - **I have tested positive for COVID-19 in the past 60 days** and completed my isolation period **AND** now have a household contact/high risk contact who has tested positive for COVID-19- **You can return to work on work isolation with daily rapid antigen testing for 10 days if one of the following conditions are met:**
 - You are able to isolate from your COVID-19 positive household/high risk contact, **OR**
 - You are unable to isolate from your COVID-19 positive household/high risk contact but you have had your COVID-19 Booster vaccine. **If no, you must stay off work for 10 days.**

*High Risk contact means you lived with, provided care for, or had similar close physical, prolonged contact without appropriate PPE, or as defined by OHSW or public health.
