

Regional Renal Plan 2024-2028:

Strategic priorities and alignment with Ontario Renal Plan (ORP) 4

Vision

We strive for kidney care that is accessible, supportive and empowering. By combining patient-centred care with academic research, we aim for our patients to have the best outcomes possible throughout their journey with kidney disease.

2024-2028 Renal program priorities:

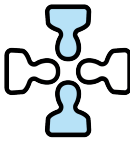

Aligns with ORP 4 goal to:

Strategic Priority 1: Further regionalization & equitable access to services

Graphics provided by Ontario Health

This priority focuses on improving access to all services by:

- Providing care closer to home
- Strengthening partnerships with relevant care and service providers
- Improving logistics and technological supports
- Performing educational outreach across our region
- Focusing on support for Indigenous and diverse populations

Advance Equity in Kidney Care

Improve Access to Timely and Effective Kidney Care

Strategic Priority 2: Improve support for patient transitions in care

This priority focuses on improving the experience for patients who transfer between service areas and care providers by:

- Working closely with patients to develop care plans
- Aiming for more timely and detailed education, training and dialogue with patients and their families
- Having quality goals-of-care discussions

Partner with Patients and Care Partners to Drive Improvement in Kidney Care

Strategic Priority 3: Grow collaborative care model & integration of allied health

This priority focuses on enhancing collaboration and coordination in care by:

- Expanding team rounds care models
- Reviewing internal communication and engagement practices
- Supporting timely access to multidisciplinary team care when and where needed

Drive Quality and Value by Supporting a Sustainable Kidney Care System

Improve Access to Timely and Effective Kidney Care
